What's the JUVE Face?

Introducing JUVE Face PN 2%, a unique medical product made in South Korea. The main ingredient is an organic Polynucleotide derived from salmon DNA, known for its fast-changing properties.

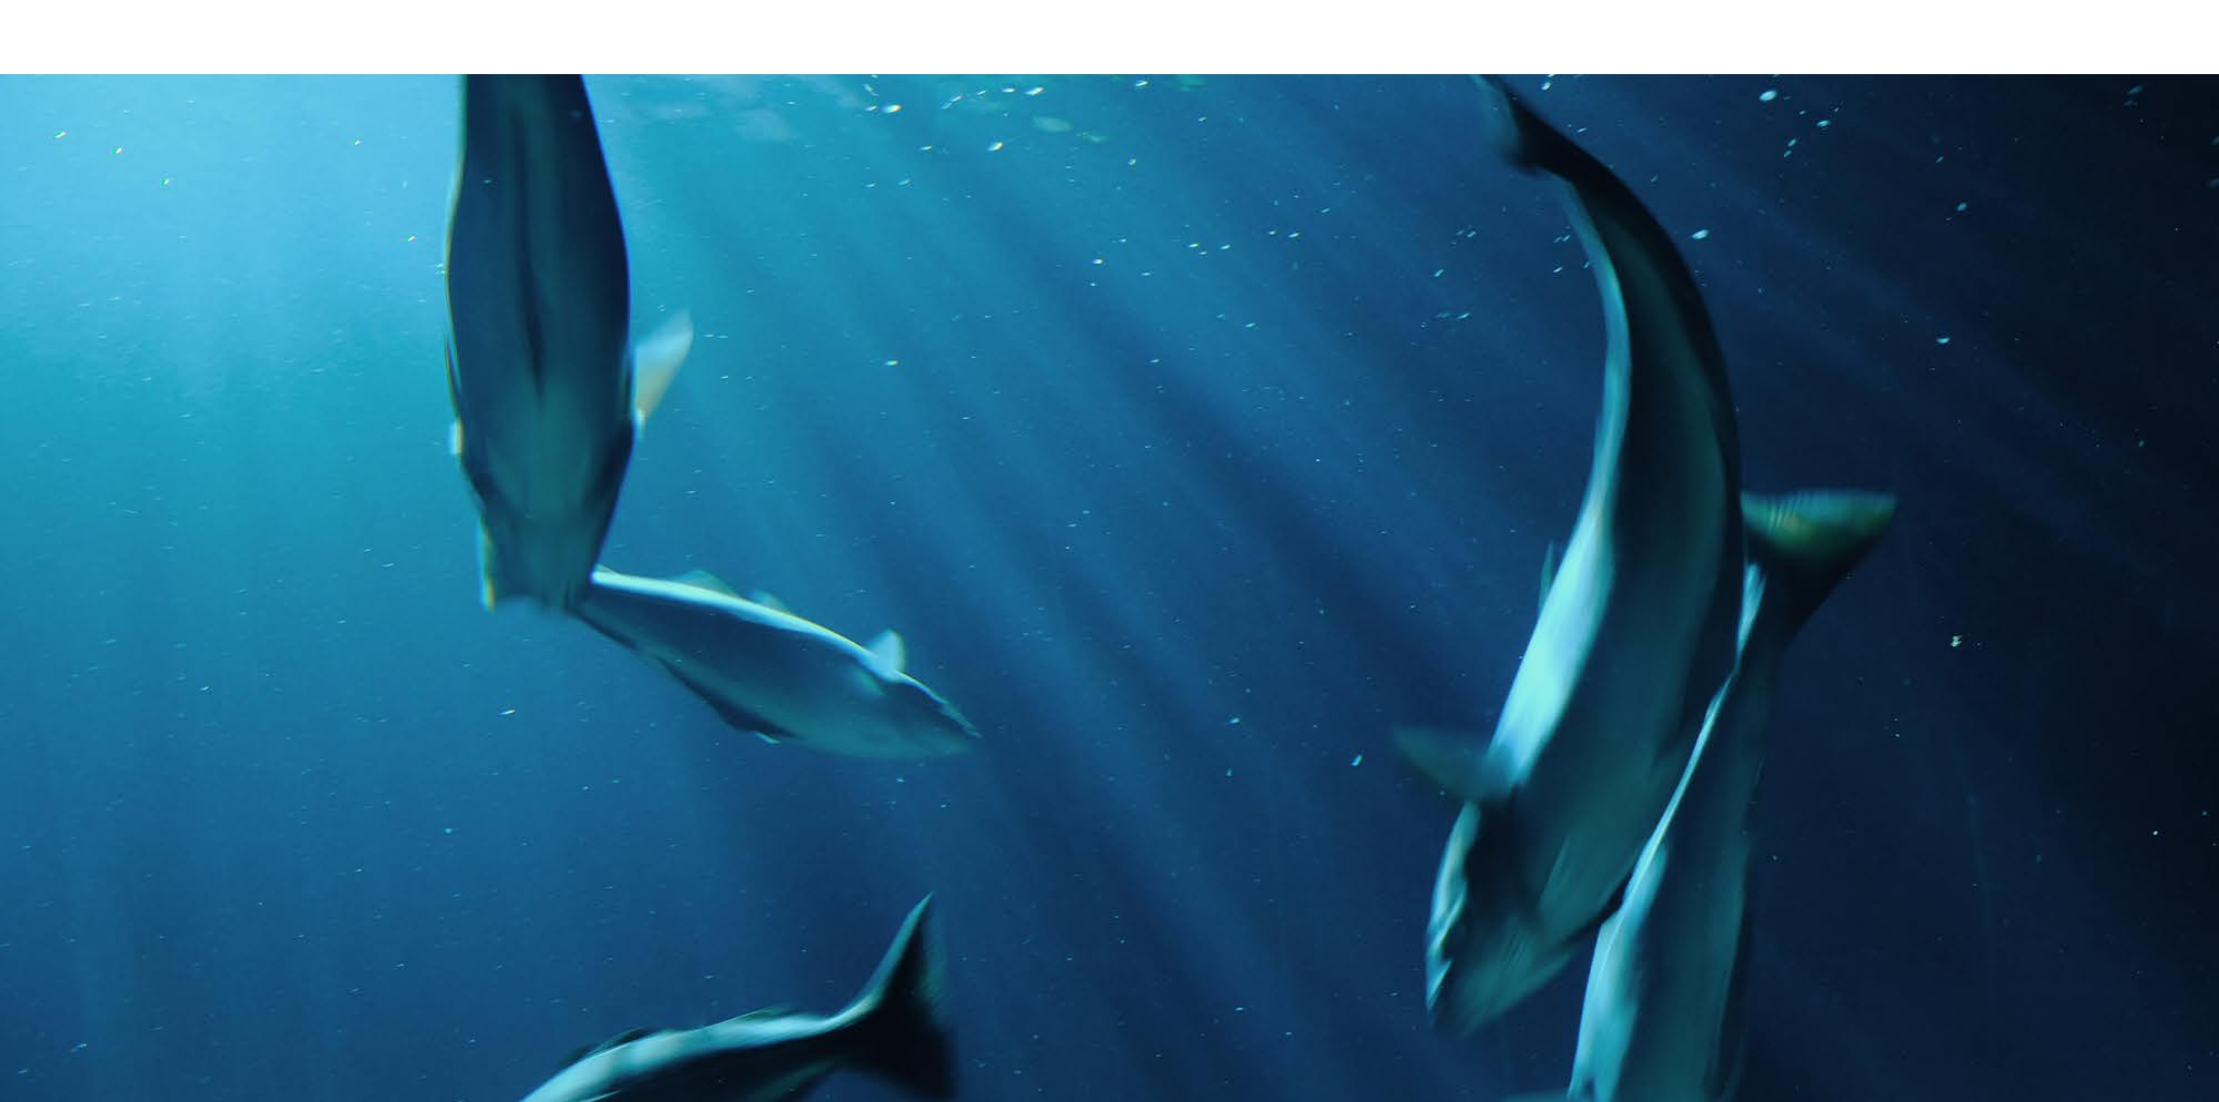
MAIN INGREDIENT

Safety

The compatibility of salmon DNA with the human body ensures complete safety and promises an experience without side effects. Elevate your skincare routine with the transformative power of JUVE Face PN 2%, where science meets safety for unparalleled results.

Elevate

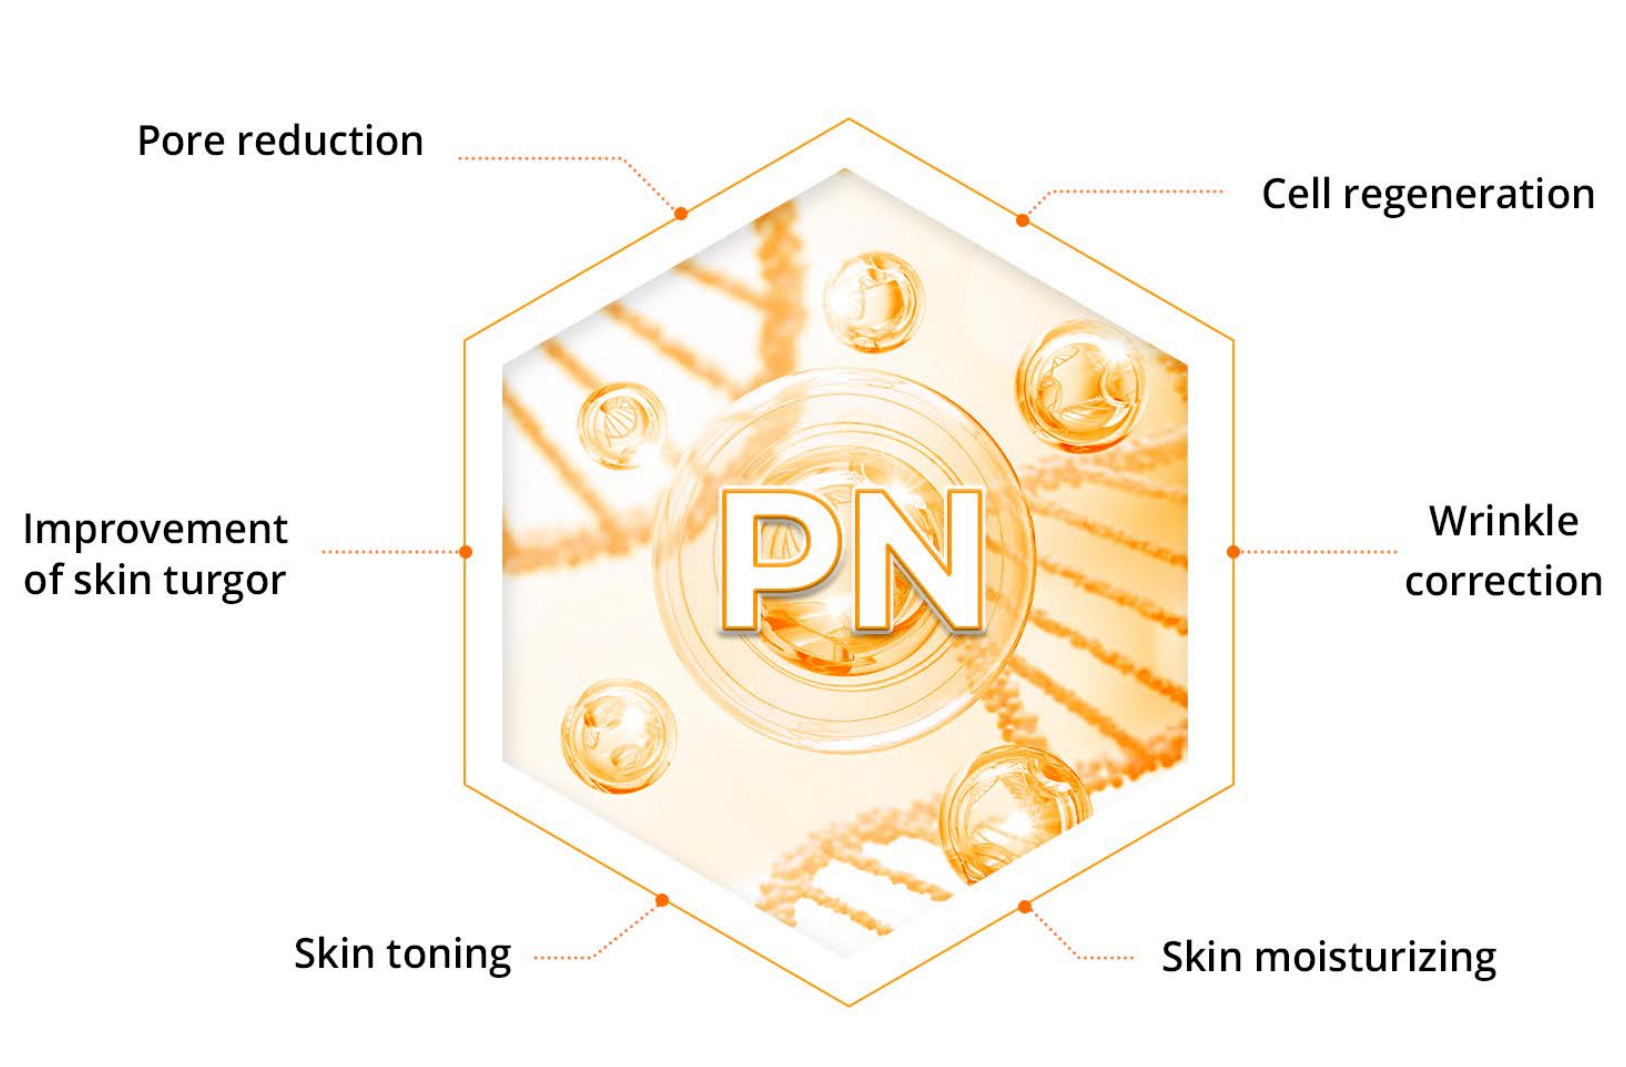
Discover the transformative power of our groundbreaking JUVE Face PN skin rejuvenation treatment – a fusion of nature's wonders and cutting-edge science. Our exclusive product JUVE Face harnesses the potential of Polynucleotide (PN), natural DNA molecules extracted from salmon, to elevate your skincare experience.



Pure and Potent PN Technology

Derived from salmon, our Polynucleotide (PN) formulations are natural and highly purified. These PN-containing products not only fill spaces but also excel in enhancing tissue regeneration, promoting a more natural and rejuvenated appearance.

Polynucleotide injection benefits



Unleash Radiance, Elevate Youthfulness

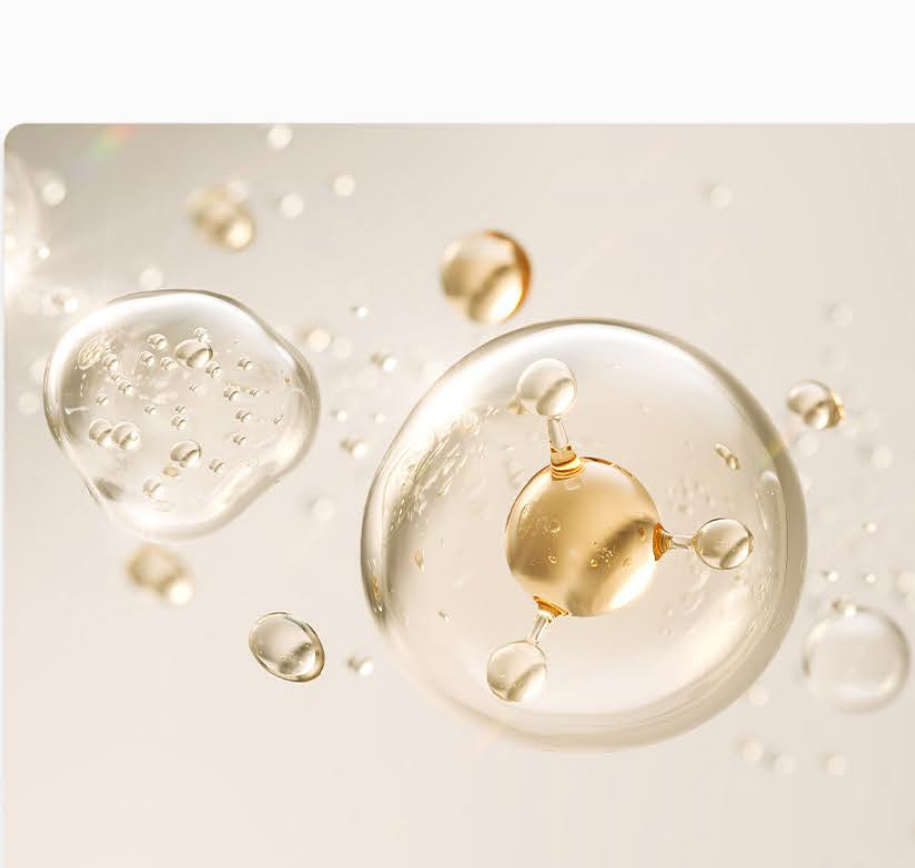
Choosing JUVE Face PN 2% for your facial skincare ensures a more potent and effective solution for skin rejuvenation. The higher concentration of Polynucleotide (PN) in the 2% formulation is scientifically proven to enhance tissue regeneration, providing superior benefits for achieving a radiant and revitalized complexion on your face. **Elevate your skincare routine with the power of 2% PN concentration,** unlocking unparalleled results for a naturally radiant and youthful appearance.

	JUVE Eyes	JUVE Face
Concentration of PN	1%	2%
Form	Gel	Gel
Volume	2mL	3mL
Tissue Regeneration	Moderate	Enhanced
Skin Rejuvenation	Visible improvement	Superior results
Recommended Areas	Sensitive Zones: periocular and perioral area	Recommended for targeted: specific areas/ face, neck, décolleté, hands, stretch marks
Clinical Evidence	Established, positive outcomes	Stronger evidence, heightened efficacy
Physician Preferences	Considered safer for widespread application	Preferred for specific, intensive treatments
Duration	Up to 6 months	Up to 12 months

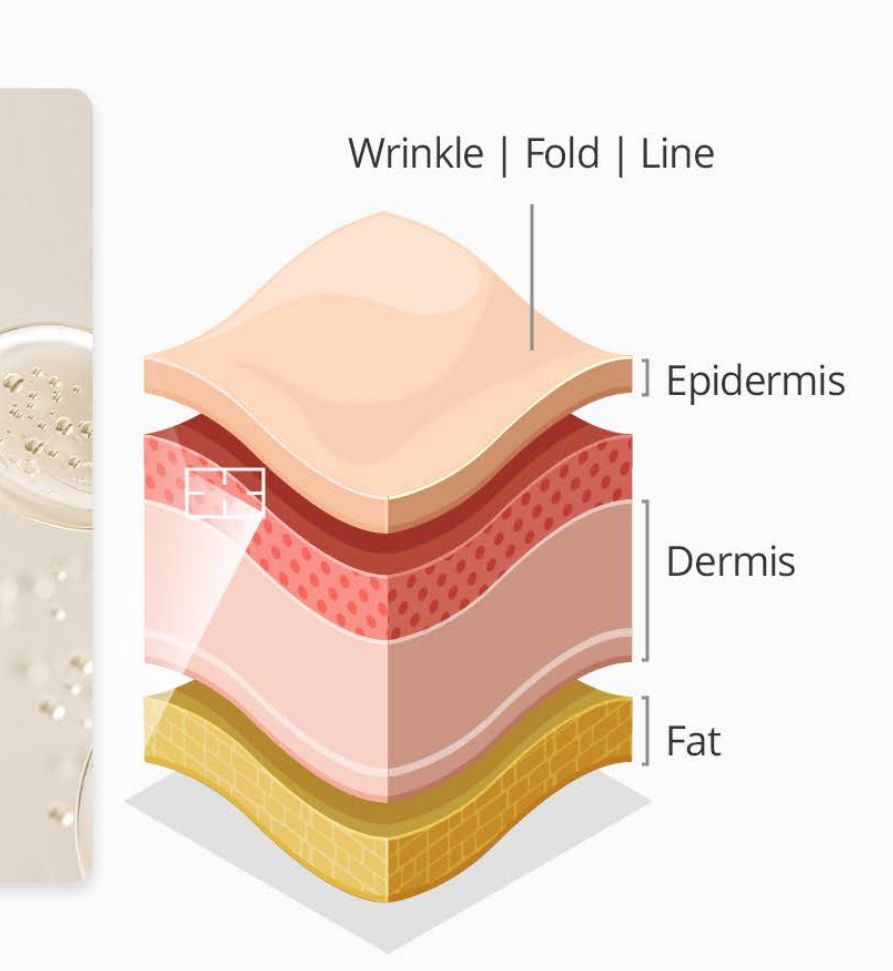
Meanwhile, the 1% formulation is crafted for delicate regions like hands and eyes. Specially designed for sensitive skin, it ensures effective care, promoting regeneration without compromise. **Choose the perfect balance for every part of you.**

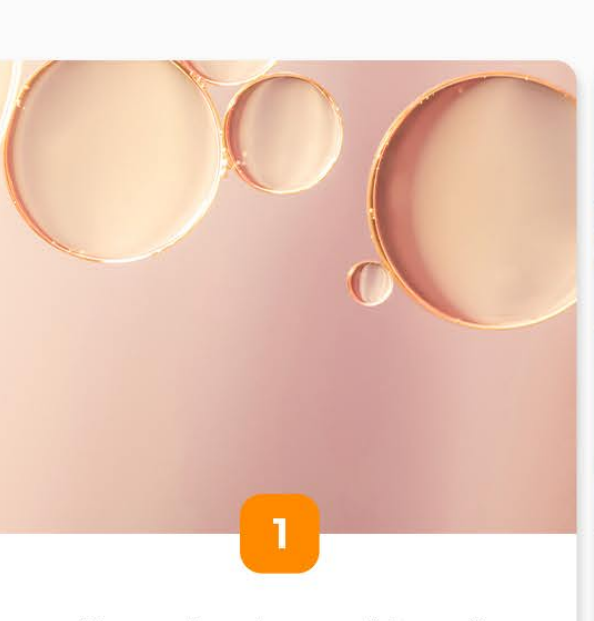
JUVE Face
3 mL x 2

Indications for JUVE Face Procedures:



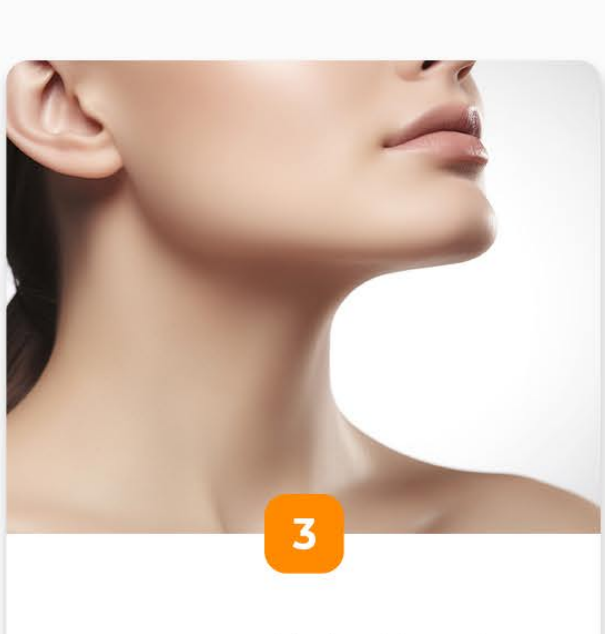
Polynucleotide





1 Normalize the condition of the skin to promote new cells growth

2 Restore the health of the epidermis and dermis



3 Improve skin health and elasticity

- Accelerate intracellular metabolism, which inevitably slows down with age
- Normalize sebum production
- Activate the synthesis of collagen fibers responsible for skin elasticity
- Stimulate regenerative processes in the dermis and epidermis
- Strengthen the skin barrier function
- Anti-inflammatory effect

Q. **How quickly** does the effect of procedures with JUVE Face come?

IN 3-5 DAYS
Skin hydration
Texture improvement
Reducing sebum secretion

IN 2-4 WEEKS
Pore reduction
Skin elasticity
Reduction of fine wrinkles

IN 4-6 WEEKS
Skin glow
Lifting effect
Skin turgor

IN 6-8 WEEKS
Hydration, beauty, and health of the skin by fundamental changes

The effect of JUVE Face lasts up to 12 months
(procedure recommended to repeat every 6 months for better results)

Injection Protocol

- Ensure the packaging is intact and undamaged.
- Check the expiration date to ensure product safety.
- Check the syringe markings to confirm the correct dosage.
- Carefully screw the needle or cannula onto the syringe. Ensure a secure fit.
- Hold the syringe firmly and remove the protective cap from the needle end.

Work Protocol
Microneedling Procedure

Anesthesia: Local anesthetic cream
Techniques of Introduction: Nappage, Micropapular
Needle Type: Needle (32-34G x 4mm), Dermapen or Mesoscooter
Depth: 1-2 mm
Angle of Inclination: 35-45°
Dose per Injection: 0.005-0.01 mL

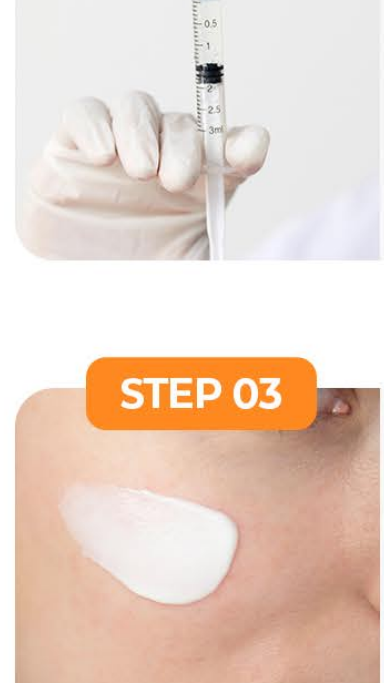
Amount of Product:
- Face: 1-2.5 mL
- Neck: 1-2.5 mL
- Cleavage: 1-2.5 mL
- Body: Up to 10 mL
- Hands: 2.5-5 mL for both

STEP 01

Preparing for the Procedure

1. Anesthetize the skin with anesthetic cream in preparation for treatment.
2. Remove the anesthetic cream and clean with alcohol swab the injection area.

STEP 02



JUVE Face Administration

1. Make injections superficial (1-2 mm deep) with a 4 mm needle.
2. Injections should be given at a 45-degree angle from the skin while applying light, constant positive pressure on the plunger; the practitioner rapidly flicks the wrist (mimics shaking a salt shaker or the action of a sewing machine).
3. At each site, introduce a drop of 0.005-0.01 mL of the solution.

STEP 03

Post-Injection Care

1. After completing the microneedling procedure, use chlorhexidine for skin cleansing.
   - Apply a small amount of chlorhexidine solution on a sterile cotton pad.
   - Gently cleanse the treated area with the cotton pad, ensuring thorough coverage.
   - Pay special attention to areas where the microneedling was performed.

Photo-aging protection: Use SPF 50 UVA and UVB protection to guard against hyperpigmentation, especially useful for damaged skin.

Course of Procedure

The course of procedures is 4-6 with an interval of 7-14 days

Repeat course after 6 months

Note

Adherence to aseptic techniques, safety guidelines, and **proper equipment sterilization are crucial during the microneedling procedure**. The provided product amounts are recommended for a face, neck, and décolleté procedure. Follow the outlined course with the specified intervals, and repeat as advised for optimal results. Adjust the dose per injection based on the specific technique employed during the procedure.

Contraindications ⊘

- Persons under the age of 18
- Individual intolerance of the drug
- During pregnancy or lactation
- Autoimmune diseases
- With diabetes
- Infections and colds in the acute stage
- Epilepsy
- In case of open ulcers, wounds or damaged skin in the area where the injection is planned

Specification

Product Name	JUVE Face
Main Ingredient	PN (Polynucleotide) 2%
Package	3 mL x 2 syringes
Storage	Store at room temperature below 30°C.
Shelf life	24 months from date of manufacture.
Duration	Up to 12 months
