

Lapiena[®] NAD³⁺

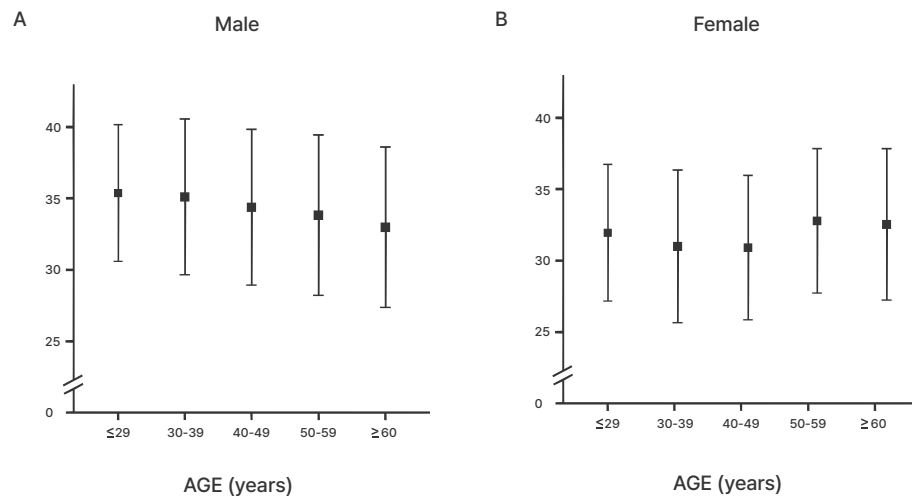

NAD ALL-in-One Skin Booster

Understanding NAD⁺

NAD⁺ (Nicotinamide Adenine Dinucleotide) is an essential coenzyme found in all living cells, playing a key role in cellular energy metabolism, DNA repair, and cellular resilience. It is synthesized from **vitamin B3-related precursors** and is critical for maintaining normal cellular function. **NAD⁺ levels naturally decline with aging**, leading to reduced cellular efficiency and repair capacity.

Age-Related Decline of NAD⁺ Levels

- Studies show a progressive reduction of NAD⁺ with increasing age, observed across adult populations.
- Lower NAD⁺ availability is associated with impaired cellular metabolism and increased age-related dysfunction.

Source: Yang et al., Association of Human Whole Blood NAD⁺ Contents with Aging, *Frontiers in Endocrinology*, 2022.

The Role of NAD⁺ & NMN in Skin Vitality

Why NAD⁺ Matters for the Skin

NAD⁺ is essential for cellular energy and regeneration, helping skin maintain healthy function and repair itself. As NAD⁺ levels decline with age, skin vitality, elasticity, and renewal can decrease.

What NMN Is and Its Benefits

NMN is a direct precursor that converts into NAD⁺ in the body, supporting stable NAD⁺ levels. It helps sustain cellular energy and supports long-term skin vitality.

Why NAD⁺ and NMN Work Best Together

NAD⁺ provides immediate cellular activation, while NMN continuously replenishes NAD⁺ to extend its effects. Together, they deliver fast activation with long-lasting skin support.

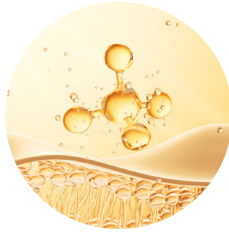

The Core Power Trio of **Lapiena[®] NAD³⁺**

	HA	NMN	NAD ⁺
Level of Action	Skin surface & dermal layer	Cellular precursor level	Cellular & genetic level
Primary Role	Hydration and skin structure support	NAD ⁺ replenishment support	Cellular metabolism and genetic regulation
Key Biological Function	Moisture retention and barrier strengthening	Conversion into NAD ⁺ to sustain cellular energy	Energy production, sirtuin activation, DNA repair
Main Skin Benefit	Immediate plumping and moisture balance	Prolonged cellular vitality	Deep, long-term skin rejuvenation
Effect Timeline	Instant and visible	Gradual and supportive	Progressive and long-lasting

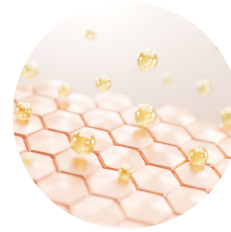

HA hydrates, NMN sustains, and NAD activates the skin at its core. From surface hydration to deep cellular activation, each ingredient works in synergy at a different level.

Lapiena[®] NAD³⁺ – The “+” Means More

Polynucleotide

Supports skin regeneration and tissue repair, improving elasticity

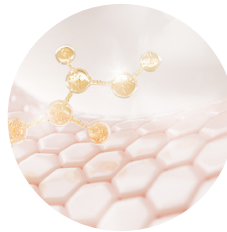

Succinic Acid

Boosts cellular metabolism and supports skin vitality

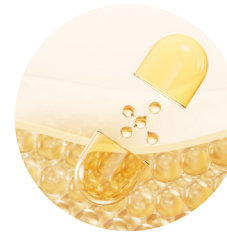

Tranexamic Acid

Helps reduce hyperpigmentation and promote an even skin tone

Niacinamide

Strengthens the skin barrier and improves texture and clarity

Glutathione

Provides antioxidant protection and supports skin brightening

Lapiena NAD³⁺ is more than just three key actives – the “+” represents a carefully selected combination of extra skin-supporting ingredients that elevate the formula’s effectiveness.

Who Is This Treatment For?

This treatment is designed for patients who want to restore skin vitality at a cellular level, enhance regeneration, and improve overall skin quality

Recommended for :

- Dull, tired, or stressed skin
- Early to moderate signs of aging (fine lines, loss of elasticity, reduced firmness)
- Post-procedure recovery (after laser, RF, microneedling, injections, or aesthetic treatments)
- Skin exposed to oxidative stress (UV, pollution, lifestyle factors)
- Compromised skin barrier and dehydration
- Loss of collagen and decreased skin density
- Skin rejuvenation without adding volume

Suitable for all skin types and applicable as both a preventive anti-aging treatment and a corrective regenerative therapy

Indications

Helps reduce the appearance of fine lines and wrinkles on the face, neck, and hands.

Supports improvement in the appearance of dark circles, fine lines, and puffiness around the eyes.

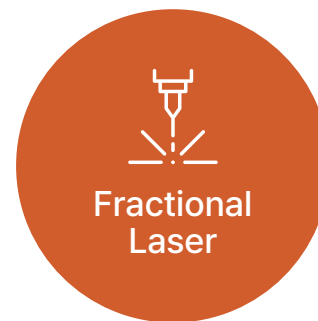

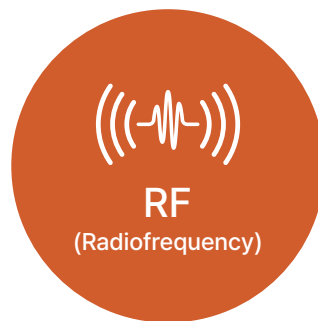

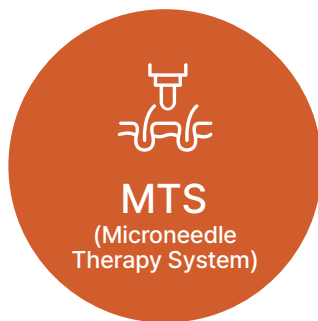

Enhances skin firmness and brightness on selected body areas.

How to use

Application Methods

Safe Application Guidelines

Store in a cool,
dry place below 30°C

For single use only

Avoid touching or
stimulating the treated
area after application

Avoid applying makeup
for at least 24 hours
after treatment

Avoid direct sun exposure
after treatment

Check for hypersensitivity
to vitamins or
NAD⁺ before use

Not recommended for
pregnant or lactating individuals
without medical advice

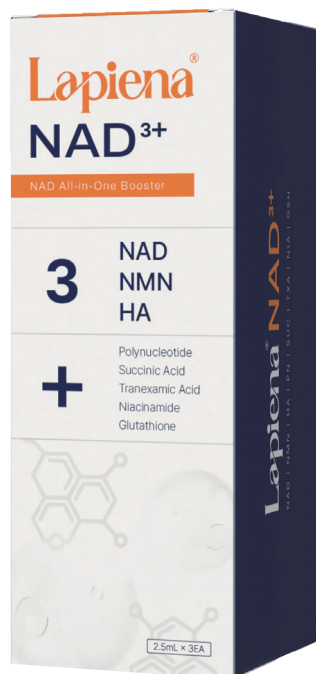

Avoid alcohol, smoking, and
sauna use for at least
24 hours after application

Consult a specialist if
any unexpected
side effects occur

Product Details

Product Name	Lapiena NAD ³⁺
Volume	2.5 mL × 3 syringes / box
Shelf Life	24 months
Storage	Store below 30°C, away from direct sunlight

Revitalize from the cellular level.
NAD³⁺ for timeless skin.
