Key Ingredients in PN Eyes

Key Ingredient

Sodium DNA

Niacinamide

Pentapeptide-4

Dipeptide-23

Trehalose

Sodium DNA (Polynucleotide)

A regenerative ingredient that supports skin repair, boosts collagen production, improves elasticity, and helps strengthen delicate under-eye skin.

Niacinamide & Tranexamic Acid

Brightening ingredients that help reduce pigmentation, improve uneven skin tone, and minimise the appearance of dark circles.

Palmitoyl Pentapeptide-4

A collagen-stimulating peptide that helps improve skin firmness, smooth fine lines, and strengthen thin under-eye skin.

Nicotinoyl Dipeptide-23

An eye-specific peptide that enhances skin vitality, improves microcirculation, and helps brighten the under-eye area.

Trehalose

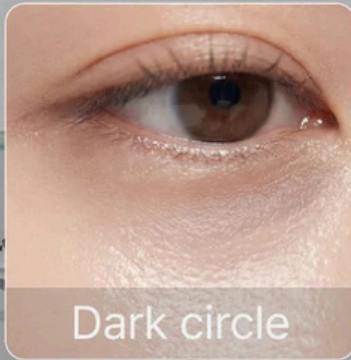

A protective sugar that helps retain moisture, protect skin cells, and improve hydration in the delicate under-eye area.

Key Benefits of Lapiena PN Eyes

What's Your *EYE NEED*?

Repair, Smooth, Brighten

All in One Drop

Dark circle

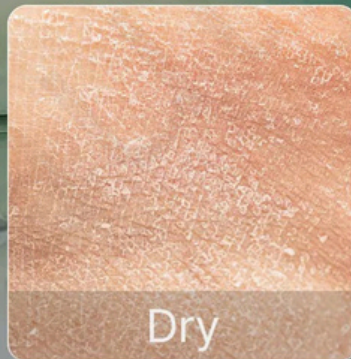

Wrinkle

Damaged

Dry

Under-Eye Skin Regeneration

DNA-based polynucleotides help repair damaged skin tissue by creating an optimal environment for cellular regeneration and recovery.

Dark Circle Improvement

Niacinamide and Tranexamic Acid work together to reduce pigmentation and brighten the under-eye area, helping diminish the appearance of dark circles and tired-looking eyes.

Reduction of Fine Lines & Wrinkles

Collagen-stimulating peptides improve skin structure and elasticity, helping reduce the appearance of fine lines and wrinkles around the eyes.

Hydration & Skin Barrier Improvement

Trehalose enhances the skin's moisture retention while protecting the delicate eye area from dehydration and environmental stress.

DNA-Based Regenerative Ingredient

Who is PN Eyes Suitable For?

Lapiena PN Eyes is ideal for individuals experiencing:

- Dark circles under the eyes
- Fine lines and early wrinkles
- Thin or fragile under-eye skin
- Dehydration and dull skin tone
- Loss of elasticity around the eyes

It is suitable for clients wanting non-surgical eye rejuvenation treatments using polynucleotide skin boosters.
