Scalp Antioxidant Care

It stops the oxidative scalp tension to prevent skin aging on scalp. And it protects hair from environmental factors.

Deeply nourishes the scalp and hair
Strengthens Hair Roots and Promotes Intensive Hair Growth

VX Main Ingredients

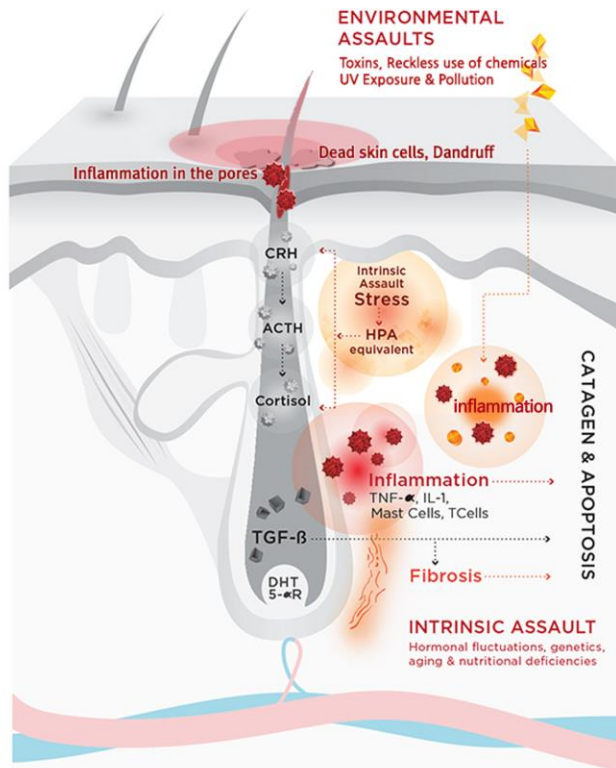

Main Active Ingredients

Cleansing and Exfoliating

Salicylic Acid, Rosemary Oil, Eucalyptus Oil, Lime Oil

Today, the secretion of sebum rapidly increases due to polluted dust, stress, unhealthy food habits, perm, dyeing, not careful usage of chemicals. When various contaminants such as dead skin cells, dandruff, and dust accumulate on the scalp, it turns into an environment that is easy for bacteria to grow. Therefore, if the scalp is not cleaned well, it causes inflammation in the pores, moreover it disrupts the growth of hair follicles, resulting in hair loss.

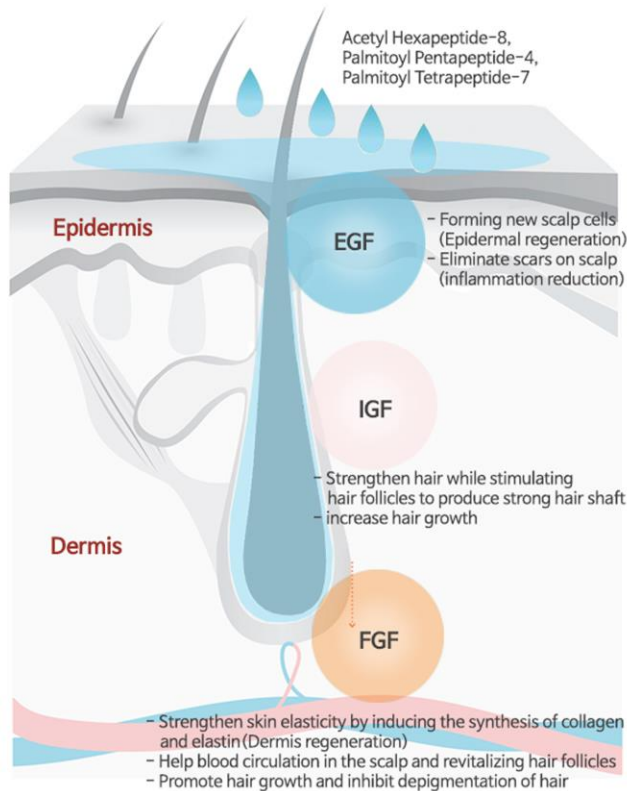

Cyclodextrin, a plant-extracted ingredient, is a low-irritating component that helps to strengthen scalp and hair roots. It effectively removes sebum as well as wastes between the hair follicles which are the cause of hair loss. Lime oil, Rosemary oil and Eucalyptus oil, that we have in our formula, are great for cleaning and moisturizing the scalp.

Main Active Ingredients

Deep Scalp Nutrition for Hair Growth Scalp & Hair Follicle Cell Activation

Acetyl Hexapeptide-8, Palmitoyl Pentapeptide-4, Palmitoyl Tetrapeptide-7
EGF, FGF, IGF (PPM 1,000)

It is very important to nourish the scalp because healthy hair is determined by the scalp. VELASH contains vitamins and nutrients necessary for healthy hair and hair growth. The components that nourish the hair follicles to settle in hair easily. With this special formula, hair loss can be treated, as it thickens thinned hair, stops hair loss, and makes the hair stronger and shinier. On top that it also stimulates collagen and elastin production that makes VELASH ideal preventing hair loss.

Growth Factor is decreased due to stress as well as aging, which increases hair loss. Therefore, promotion of Growth Factor production by the safe method is critical for maintenance of healthy hair growth together with restoration of hair for patients with alopecia.

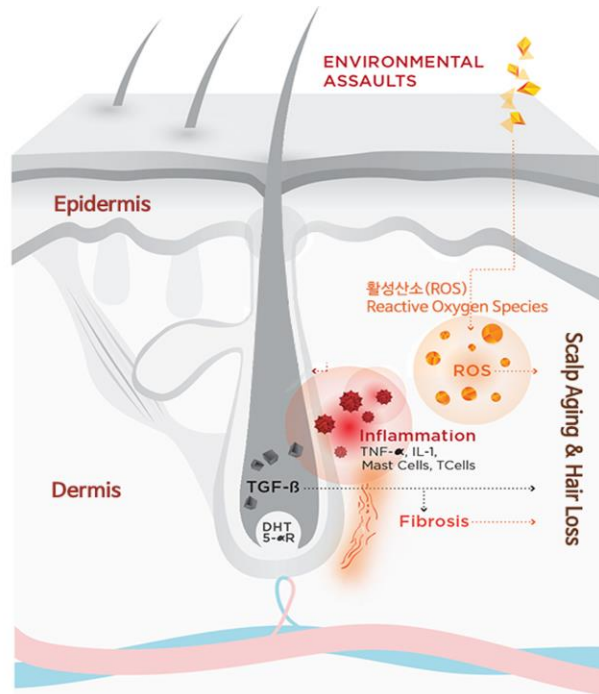

Epidermal growth factor (EGF), fibroblast growth factor (FGF), vascular endothelial growth factor (VEGF), and insulin-like growth factor (IGF) provides improved blood circulation in the scalp, revitalizes scalp cells and stimulates intensive hair growth.

VX Main Active Ingredients

A natural Scalp Antioxidant. Great for Preventing Hair Loss & Providing Anti-Aging properties

Biotin, Vitamin C, B2, B3, B12, Nicotinoyl Tripeptide-1, Adenosine Copper Tripeptide-1, Arbutin, Rosemary Oil

Vitamin C is a representative antioxidant that helps treating hair loss. It is more effective when used with Biotin and copper Tripeptide Biotin, vitamin B7. Because it's helpful in preventing and treating hair loss. If biotin is insufficient, hair loss can occur.

Recently, the Ministry of Korea Food and Drug Safety made a statement that as a generic drug it is effective for hair growth. Hair is consisted of 80-90% keratin protein. Therefore, when keratin production is insufficient or keratin is destroyed by environmental factors, there is a high possibility of hair loss. Insufficient keratin results in reduced hair growth.

The keratin component of hair consists of amino acids, and among them, the component of cystine, which contains sulfur, is the highest, which is important for the elasticity, strength and health of the hair.

Biotin acts as a coenzyme that makes keratin proteins in hair loss treatment.

Vitamin C, B2, B3, B12 also helps strengthen hair. Vitamin C, B2, B3, B12 is helpful in removing free radicals(ROS), because it is involved in improving blood circulation and synthesizing collagen. When collagen decreases in the scalp, the hair loses its strength. When collagen decreases, the hair follicles shrink and the hair becomes weaker. Promotes collagen synthesis, thereby promoting the production of hair growth factors.

Velash We Recommend Velash If

You have a receding hairline, thinning or weak hair

Your hair falls out a lot after washing or drying it

Your scalp is itchy due to frequent scalp acne or inflammation

You have dandruff, clogged pores on your scalp

You have greasy hair that gives off an unpleasant odor

Dry and itchy scalp due to build up

Oily scalp with dandruff and clogged pores due to overproduction of sebum

Improving scalp condition and hair loss. Great care program for keeping your scalp clean and healthy.

A total repair of damaged hair caused by frequent hair dyeing and perms

Non-stop scalp nourishment prevents hair loss and promotes intensive hair growth
