

GTM PDRN SKIN BOOSTER

Description

GTM Gold Cell PDRN 5% is an innovative bio revitalization solution designed to rejuvenate skin from within, improving its health, texture, and appearance with a blend of scientifically selected ingredients. Developed by CMED Medical Group in South Korea, this advanced injectable formula includes 5% polyribonucleotide's (PDRN) derived from salmon DNA, 5% hyaluronic acid for intense hydration, and 2% glutathione for pigmentation control and skin clarity. GTM Gold Cell 5% provides deep hydration, encourages tissue regeneration, and enhances skin elasticity, making it an ideal choice for comprehensive skin rejuvenation.

This product effectively targets a variety of skin concerns, including dryness, dullness, pigmentation, acne, and scarring. It is designed for use by trained professionals who want to offer clients a premium skincare experience that yields both immediate and long-lasting results.

Key Ingredients and Their Benefits

1. Polyribonucleotides (PDRN) 5%:

- Rejuvenation and Repair: The 5% concentration of polyribonucleotide's supports the skin's natural healing process, stimulating cellular repair to rejuvenate aging or damaged skin.
- Scar Reduction: PDRN enhances cellular turnover, reducing the visibility of scars and promoting an even skin texture.
- Structure and Elasticity: This ingredient also boosts collagen synthesis, which reinforces skin elasticity and structure for a more youthful appearance.

2. Hyaluronic Acid (5%):

- Deep Hydration: Known for its moisture-retaining properties, hyaluronic acid provides the skin with long-lasting hydration, addressing dryness and dullness effectively.
- Firmness and Resilience: By maintaining optimal hydration levels, HA improves skin plumpness and resilience, reducing fine lines and imparting a fresh, youthful glow.

3. Glutathione (2%):

- Pigmentation Control: As a powerful antioxidant, glutathione addresses pigmentation issues, including dark spots and uneven skin tone, while offering protection from oxidative damage.
- Acne and Erythema Reduction: Glutathione's anti-inflammatory properties help soothe acne-prone skin and reduce redness, leading to a clearer and more balanced complexion.

4. Essential Vitamins:

- Photo-Protection: Vitamins in the formula add a layer of protection against UV damage, helping minimize photo-aging effects.
- Oxidative Defense: These vitamins also work as antioxidants, reducing oxidative stress that can contribute to premature aging.

Core Benefits of GTM Gold Cell 5%

- **Longevity and Stability:** This solution is formulated to ensure that each treatment provides prolonged results, keeping the skin firm, hydrated, and radiant for months.
- **Safety and Comfort:** With a composition centered on natural, biocompatible ingredients, GTM Gold Cell 5% is ideal for sensitive skin and minimizes the risk of adverse reactions.
- **Immediate, Visible Improvements:** The skin responds quickly to the formula, revealing noticeable hydration, brightness, and smoothness post-treatment.
- **Complementary Use:** GTM Gold Cell 5% is versatile enough to be combined with other skin treatments, enhancing the results of skincare routines and in-office procedures alike.

Applications and Treatment Areas

GTM Gold Cell 5% is an excellent choice for various aesthetic needs. It is particularly effective for:

- **Deep Hydration:** The hyaluronic acid component delivers intense moisture, rejuvenating dull, tired skin and promoting a plump, dewy appearance.
- **Skin Firming:** By supporting collagen synthesis, GTM Gold Cell 5% improves skin elasticity and structure, helping skin feel firmer and look more youthful.
- **Acne and Erythema Treatment:** Glutathione combats acne and reduces skin redness, soothing irritated areas and fostering a healthier complexion.
- **Pigmentation Control:** This product addresses pigmentation concerns, helping to even out skin tone and reduce dark spots.
- **Scar Reduction:** The regenerative properties of PDRN aid in diminishing scars, making the skin smoother and more uniform in texture.

Recommended Usage and Treatment Protocol

Designed for use by certified aesthetic professionals, GTM Gold Cell 5% is best administered through microinjections to the dermis layer. Treatment plans may vary depending on individual skin needs, but the recommended regimen includes multiple sessions spaced out over several weeks to achieve and maintain optimal results.

- **Frequency:** For best results, an initial series of 3-4 treatments may be administered, with maintenance sessions as required.
- **Professional Application:** This product should only be handled by licensed professionals who are trained in advanced aesthetic procedures to ensure the safety and efficacy of each treatment.

Product Details and Packaging

- **Composition:** The formula includes 5% PDRN, 5% hyaluronic acid, and 2% glutathione for a balanced approach to skin health.
- **Packaging:** Available in a set of 10 vials, each containing 3.3 ml, GTM Gold Cell 5% provides sufficient product for multiple sessions.
- **Manufacturer:** Produced by CMED Medical Group, South Korea, a reputable leader in aesthetic products, GTM Gold Cell 5% meets high standards for quality and safety.

Ideal Candidates for GTM Gold Cell 5%

This biorevitalization solution is suited for individuals who are:

- **Seeking Anti-Aging Solutions:** Those experiencing early signs of aging, including fine lines, wrinkles, and reduced elasticity.
- **Prone to Acne or Redness:** The calming effects of glutathione make it suitable for acne-prone skin and those with sensitive skin concerns like erythema.
- **Looking for Brightening and Pigmentation Correction:** Ideal for clients who want to achieve a more even, radiant complexion by addressing dark spots and pigmentation issues.
- **Concerned About Scarring:** PDRN promotes cellular renewal and repair, which can reduce the appearance of scars and improve overall skin texture.

Storage Instructions and Safety Precautions

- Storage: Store in a cool, dry place away from direct sunlight, ideally between 1°C and 30°C, to preserve the product's integrity and effectiveness.
- Safety: GTM Gold Cell 5% should not be self-administered. Professional consultation is recommended to ensure that it suits the client's skin type and health condition, minimizing the risk of potential adverse effects.

GTM Gold Cell 5% represents a top-tier solution for comprehensive skin rejuvenation. With its scientifically backed formula and rapid results, GTM Gold Cell 5% is a versatile and valuable addition to any professional skincare practice, promising clients hydrated, radiant, and youthful skin.
