Hi,NMN

Product Overview

Professional NMN Recovery Support.

Hi,NMN 5.5% & 15% Skin Booster is a professional-use NMN skin booster designed for recovery support after advanced aesthetic treatments. It is positioned for MTS, microneedling, RF, ultrasound and related post-treatment workflows.

Product type

High-concentration NMN skin booster

Format

1 vial or 3 vial

Recommended use

Recovery support for advanced aesthetic treatment protocols

Clinical positioning

A high-strength NMN formulation intended for professional clinic use where intensive post-treatment support is required.

“

High-strength NMN support for recovery-led protocols.

”

Hi,NMN

High-Dose NMN

Why concentration matters.

Due to its short half-life of approximately 36–48 hours, NAD+ is rapidly depleted by cellular enzymes such as sirtuins, PARPs and CD38. Through cofactor stabilisation including ASC-EXR and ginseng peptide, Hi,NMN is positioned to support longer-lasting improvement.

Daily NMN requirement for skin

Age	Daily NMN need
20s	10 mg
30s	15 mg
40s	20 mg
50s	30 mg
60s	40 mg
70s	150 mg

Rationale

Ageing brings a progressive loss in the number and function of skin cells. Sirtuin activity and NAD+ decrease significantly. Timely NMN supplementation for skin is critical before irreversible ageing takes hold.

Half-life model

Content	Real NMN mg based on 3ml	Day 0	Day 2	Day 4	Day 6	Day 8	Day 10	Day 12	Day 14
0.01%	0.3	0.15	0.1	0.0	0.0	0.0	0.0	0.0	0.0
0.1%	3	1.5	0.8	0.4	0.2	0.1	0.0	0.0	0.0
1%	30	15	7.5	3.8	1.9	0.9	0.5	0.2	0.1
2%	60	30	15.0	7.5	3.8	1.9	0.9	0.5	0.2
5%	150	75	37.5	18.8	9.4	4.7	2.3	1.2	0.6
10%	300	150	75.0	37.5	18.8	9.4	4.7	2.3	1.2
15%	450	225	112.5	56.3	28.1	14.1	7.0	3.5	1.8

“ Percentage means nothing without real NMN content. Check the actual mg. Only 50mg+ delivers visible results ”

Hi,NMN

Formula Architecture

Main ingredients.

Hi,NMN Skin Booster is built around high-strength NMN with a supporting complex of hydration, repair and growth-support actives.

The NMN ingredient used in Hi,NMN skinbooster is manufactured in Korea and is a verified ingredient made through a fermentation and enzyme refinement process, not chemical synthesis.

Core NMN

15% NMN / 450 mg per 3 mL vial
5.5% NMN / 165 mg per 3 mL vial

Supportive complexes

MC-PDRN, ASC-EXR,
Triple HA complex,
Meristem-Ginseng

Additional actives

TMG, EGF, FGF,
Ginseng peptide,
Vitamin B complex (B3, B5),
Amino acid complex

ASC-EXR may vary depending on country-specific regulations.

A high-dose NMN formula supported by hydration, repair and regenerative actives.

Hi,NMN

Ingredient Effects

Supplier-stated effects.

01

Reverse-ageing

Alleviates signs of skin ageing by reducing reactive oxygen species (ROS) and helping prevent water loss.

02

Anti-inflammatory

Linked to reduced skin inflammation and prevention of lesions, itching, rash and scaling, especially in eczema-like conditions.

03

Wound healing

Promotes skin regeneration and wound healing, particularly in elderly individuals. Enhances collagen synthesis and activates skin-regeneration proteins such as VEGF and TGF- β .

04

Whitening / UV support

Helps protect skin cells from UV damage by maintaining NAD⁺ levels, supporting cell energy production and proliferation.

Designed as intensive recovery support around a high-strength NMN base.

Hi,NMN

Professional Protocol

How to use.

Professional guidance for MTS, microneedling, RF and energy-based workflows. Treatment suitability, device choice and depth remain the responsibility of the qualified practitioner.

01

Use of NMN 1A / 3ml vial

Prepare the full content in a sterile syringe or dropper for drip application.

02

Pre-treatment skin preparation

Clean and disinfect the treatment area with alcohol or chlorhexidine. Ensure the skin is completely dry.

03

Application for face and scalp

Apply NMN 1A evenly across the entire face. Use an MTS device, microneedling, Derma Pen or Derma Roller to facilitate transdermal delivery.

04

Post-treatment care

For any remaining solution, enhance absorption using ultrasound (LIPUS) or finish with a modelling mask pack.

Depth guide

Purpose	Depth	Use case
Cosmetic	0.5 mm	Surface-level rejuvenation, whitening and basic skin regeneration.
Cosmetic + therapeutic	1.0 mm	Moderate issues such as acne scars, fine lines and elasticity.
Therapeutic only	1.5 mm	Deeper pigmentation, deeper wrinkles and severe skin conditions.

Advanced workflow applications.

Whitening treatments

For whitening treatments using QSND (MI laser) or Pico Laser, NMN Booster is recommended to support recovery of the skin barrier and help prevent dryness and folliculitis caused by the procedure.

Laser finishing

After laser treatment, apply the selected skin booster drop by drop and absorb using ultrasound. If required, adjust viscosity with Primary U essence gel or similar product.

Acne scars / tissue improvement

For more aggressive tissue improvement needed for scars, including post-Potenza, Silfirm or other fractional laser, NMN booster is recommended.

Device protocol notes

	CureJet	May be incorporated into professional CureJet-led treatment protocols where suitable, as part of a recovery-focused approach to advanced aesthetic procedures
	TargetCool	May be used within professional TargetCool-supported treatment pathways where appropriate, helping support post-treatment comfort, recovery and skin quality after advanced aesthetic procedures
	Finishing	Depending on the clinic's setup, remaining skin booster can be absorbed using ultrasound or finished with a soothing mask.

Treatment decisions, device choice, dosing and suitability remain the responsibility of the qualified practitioner.

Hi, NMN

Bring Hi, NMN into your clinic.

A professional NMN skin booster distributed by
LOOKUP MEDICAL, South Korea, built around high-
dose NMN recovery support for advanced aesthetic
treatment protocols.
