Hyaluronic Acid

Rich & Young Skin Structure

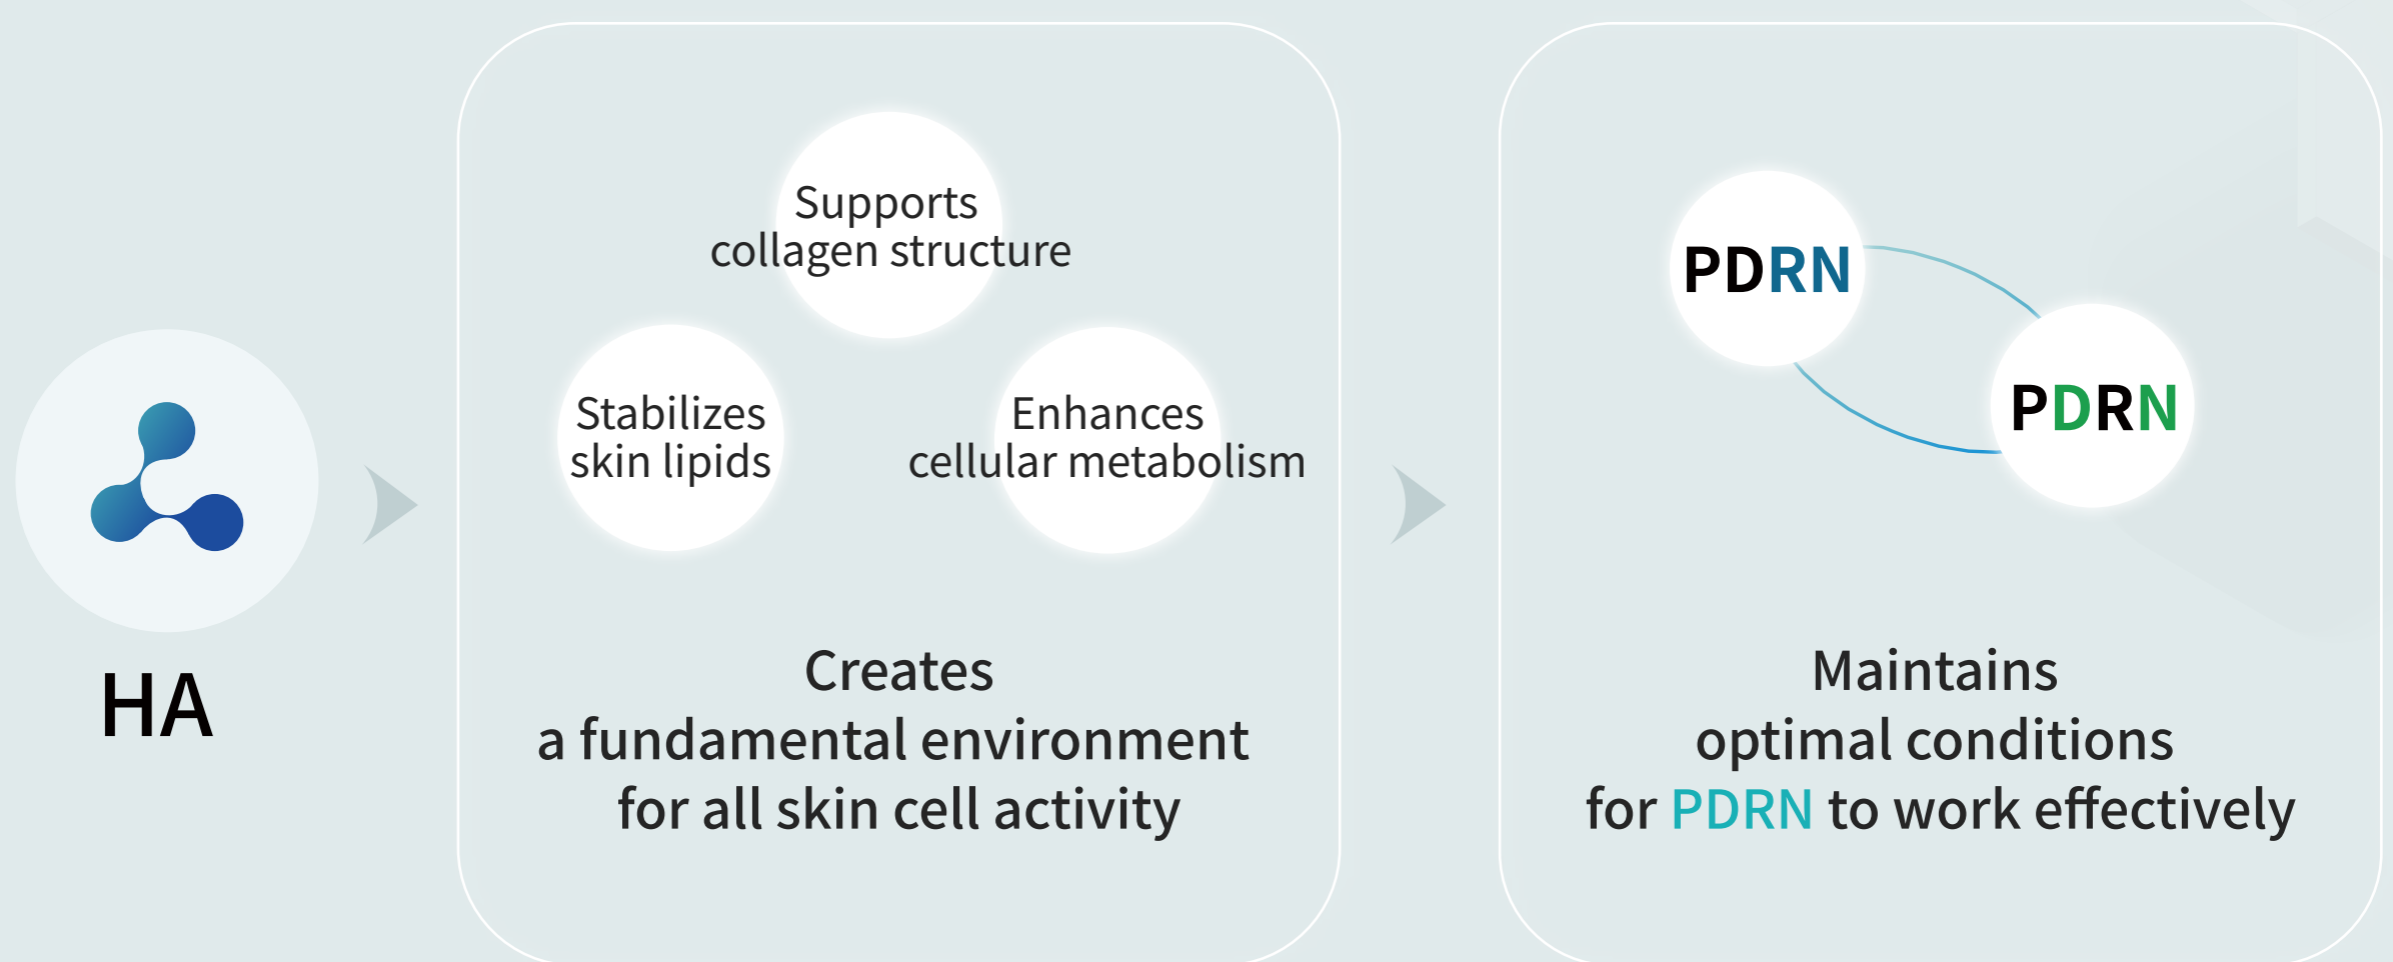

Purified PDRN acts as a direct DNA source, fueling the skin's self-regeneration. As a key form of nucleic acid, it restores Collagen, Elastin and Cells.

Without sufficient nucleic acids, cells lose their regenerative function, gradually deteriorate, and eventually undergo aging and cell death.

Moist & Sooth Skin Texture

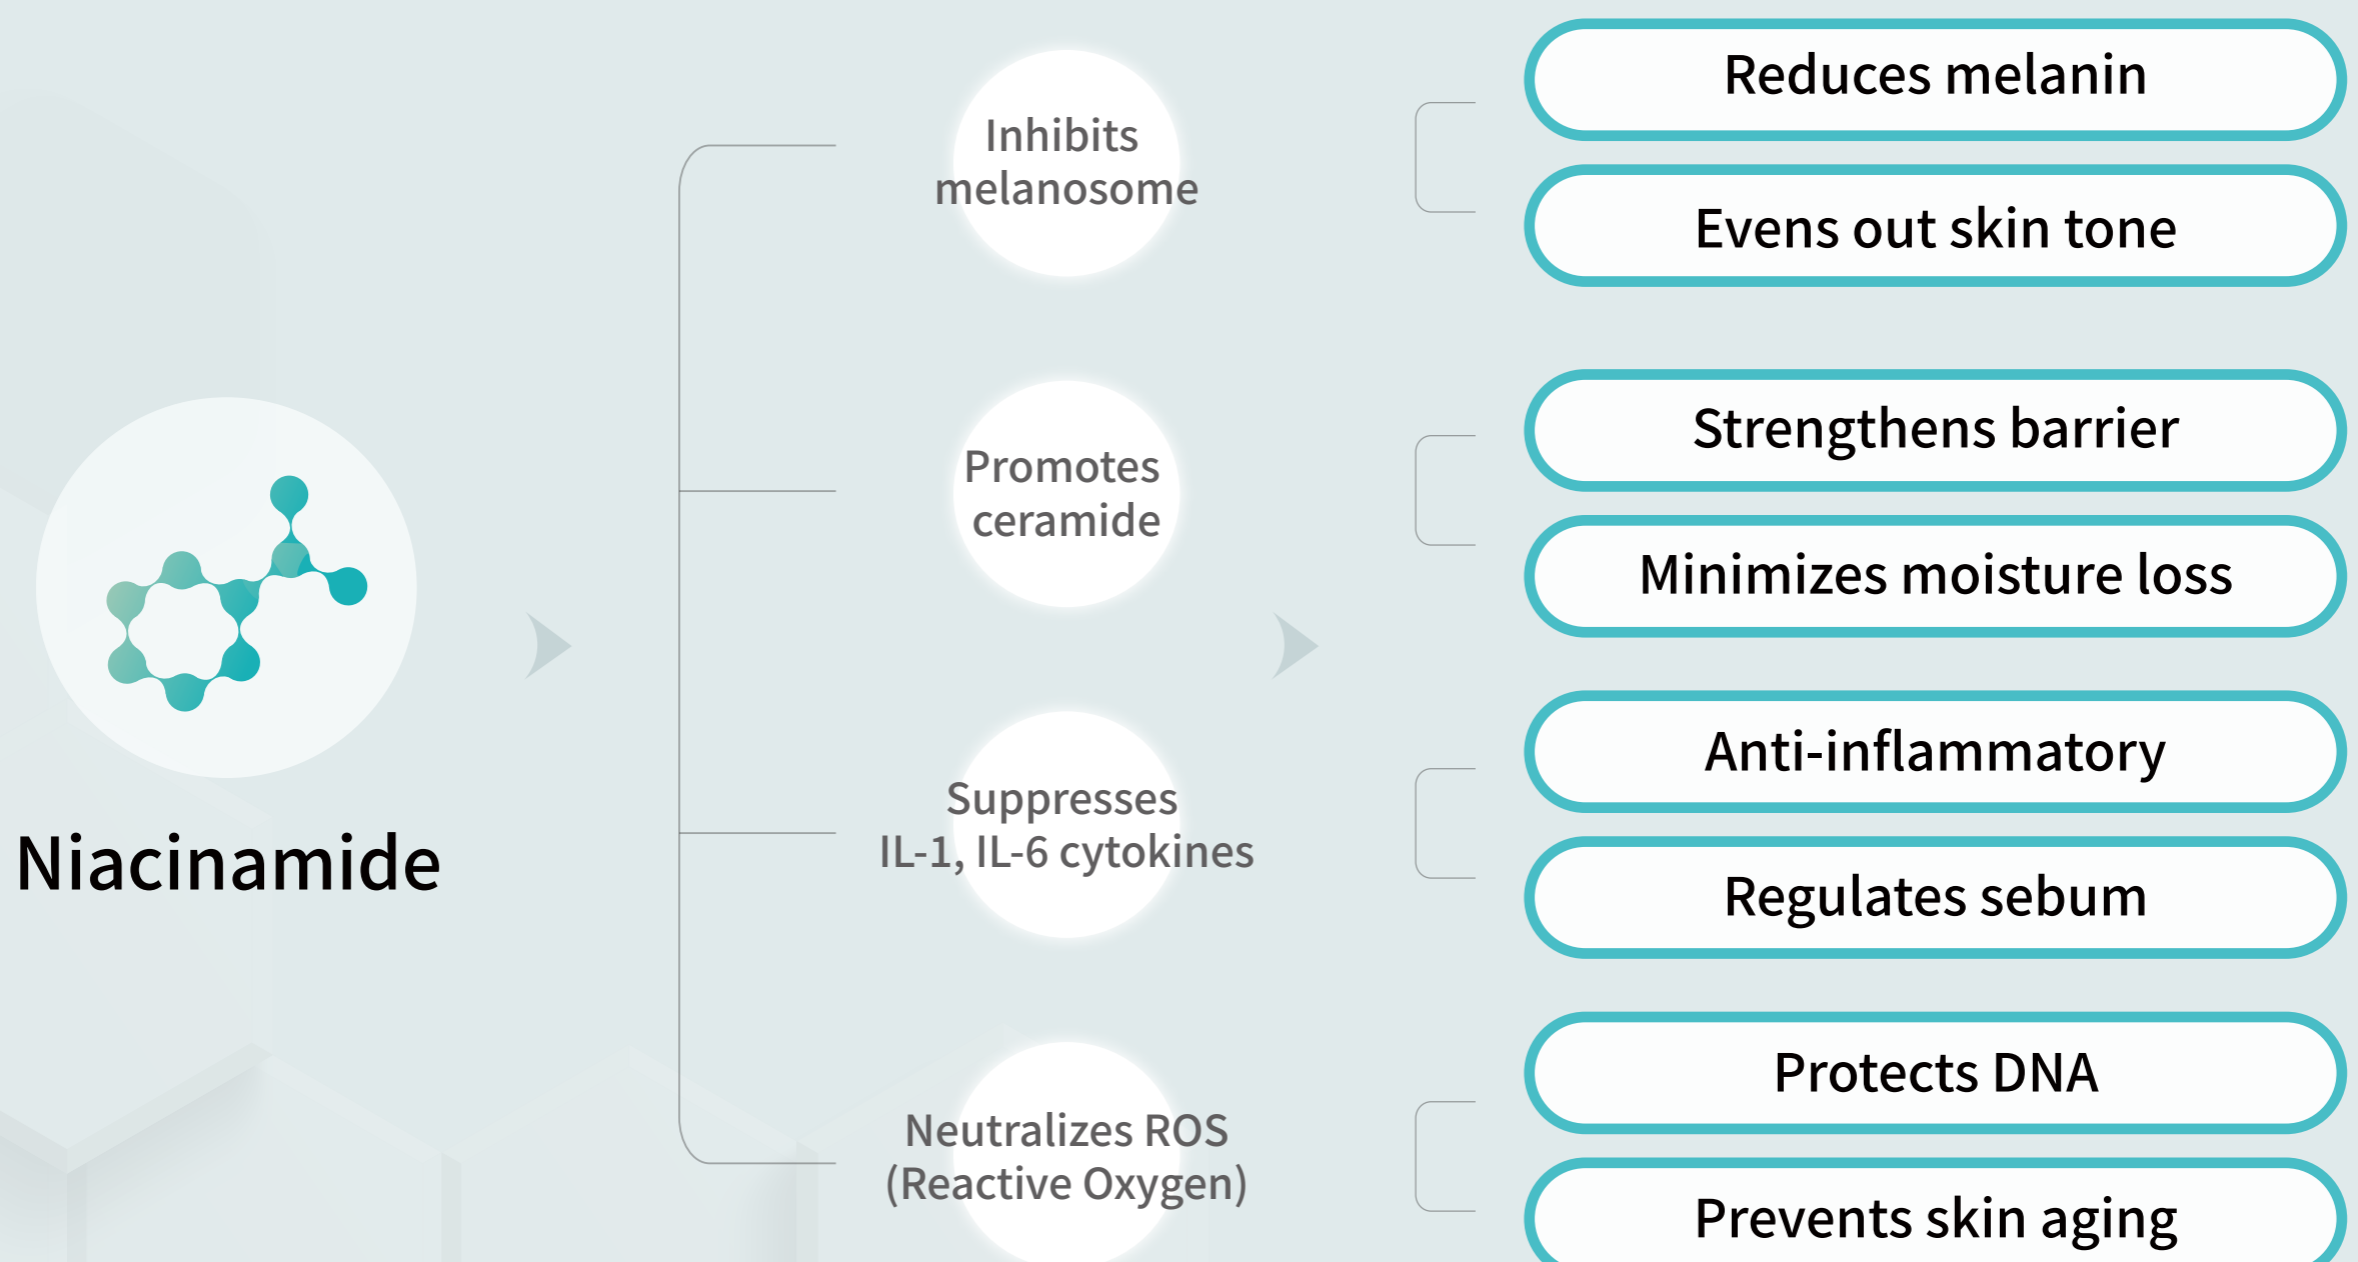

The **Hyaluronic Acid** in PURI PDRN can attract and retain up to 1,000 times its weight in water, It plays a critical role in helping skin and cells stay hydrated and function properly.

Even & Brighter Skin Tone

The **Niacinamide** in PURI PDRN helps prevent melanin pigmentation, resulting in a brighter and more even skin tone.

Niacinamide also supports overall skin function, enhancing the multi-faceted skin-repairing effects of **purified PDRN**.

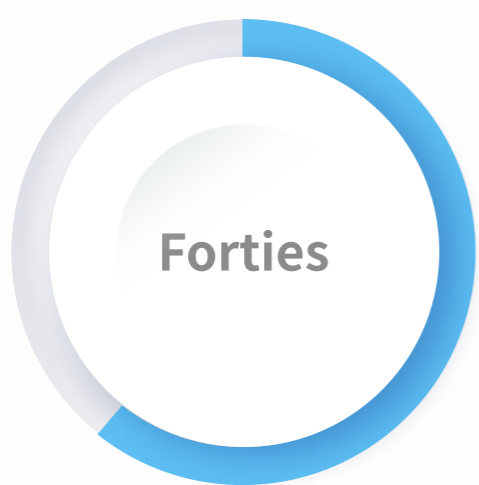

Results from clinical trials

Clinical data obtained over 4 months, following 4 treatment sessions at 2-week intervals and an 8-week follow-up phase.

Skin Density

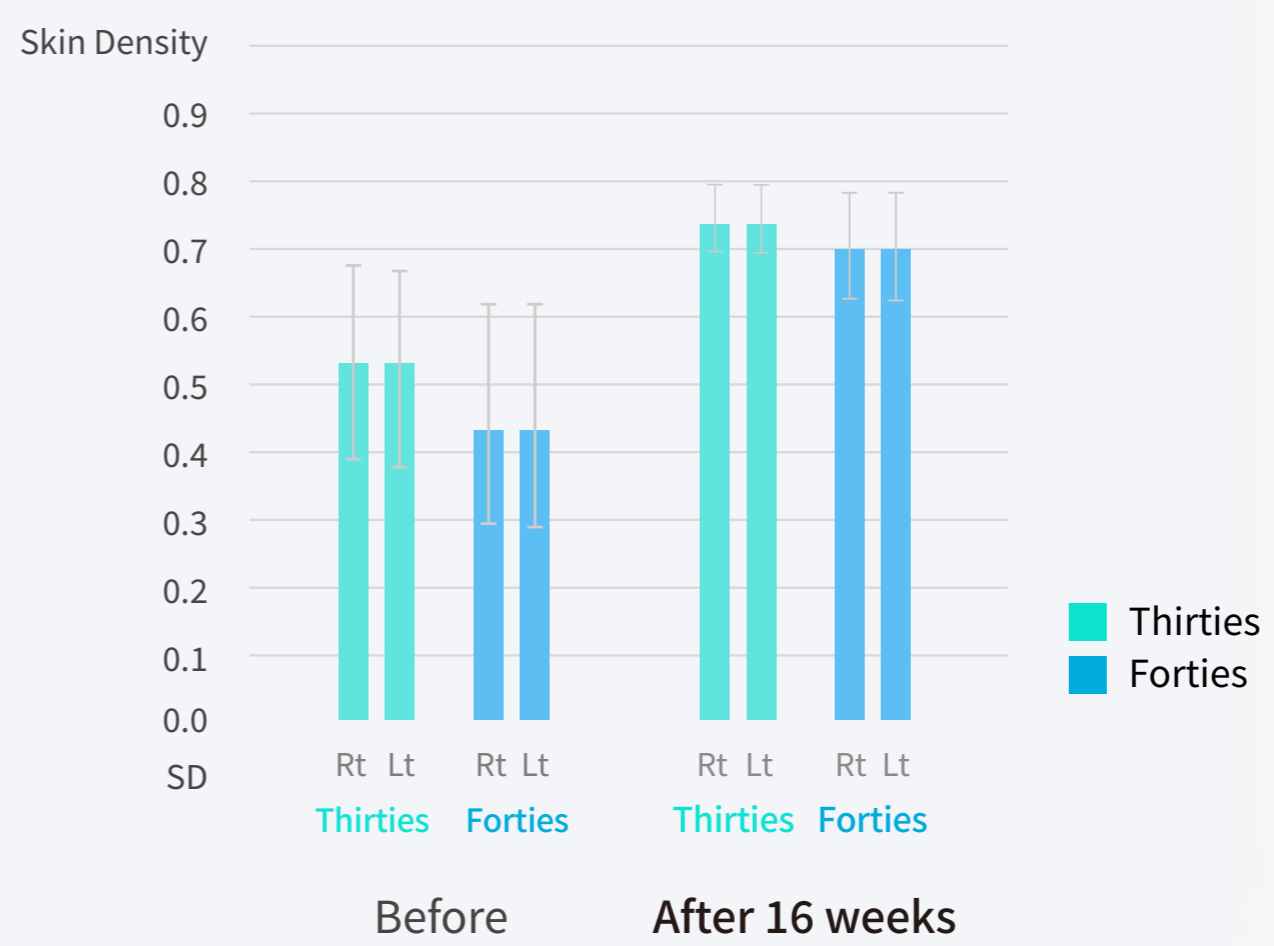

An average increase of **41.85%**

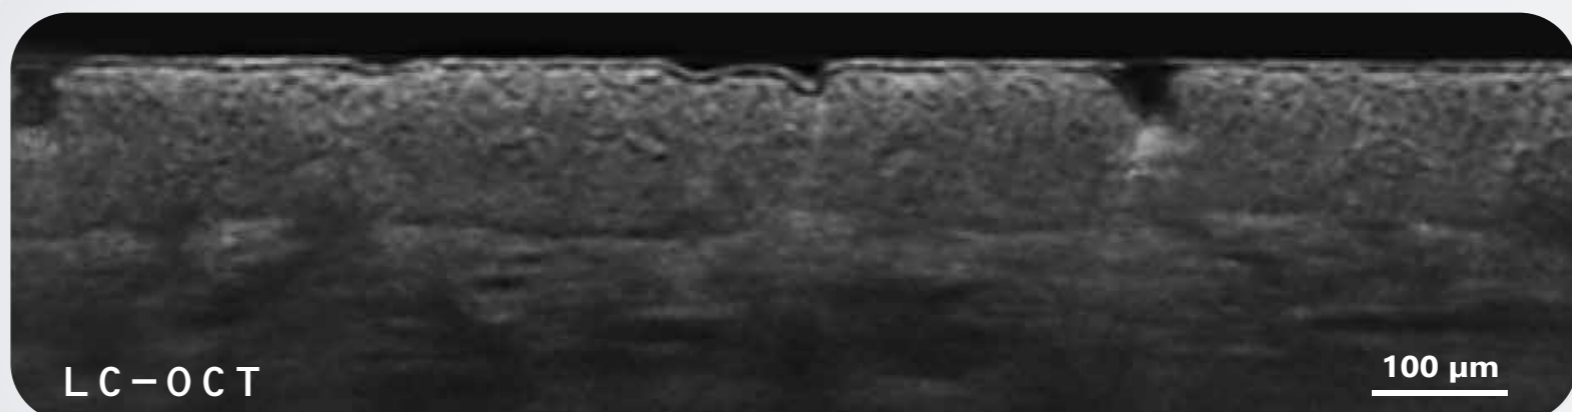

An average increase of **64.85%**

Skin Density Improvement (SD)

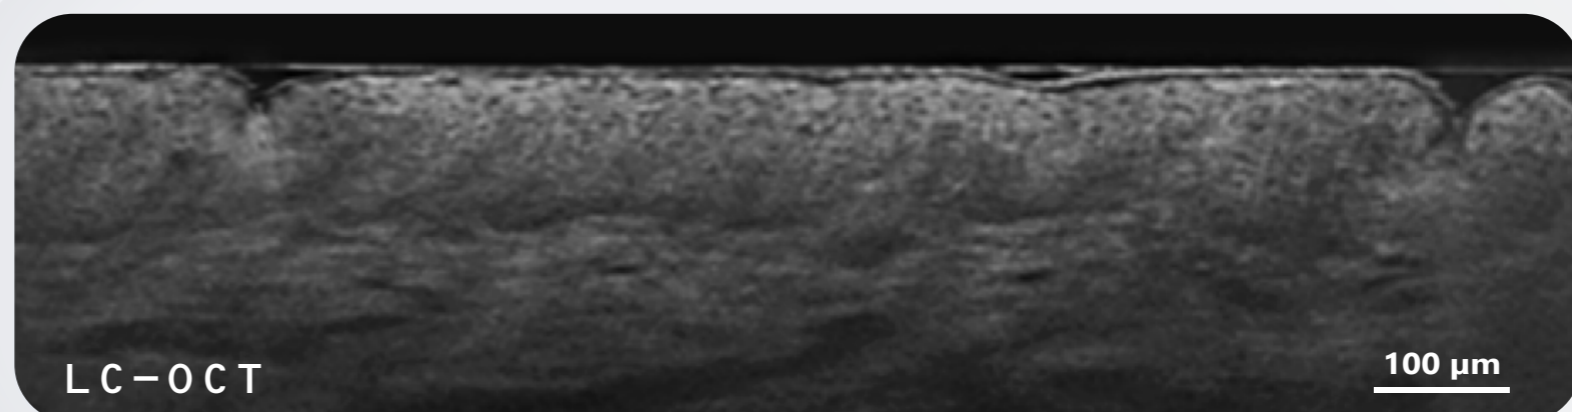

Optical Coherence Tomography (OCT) measurement

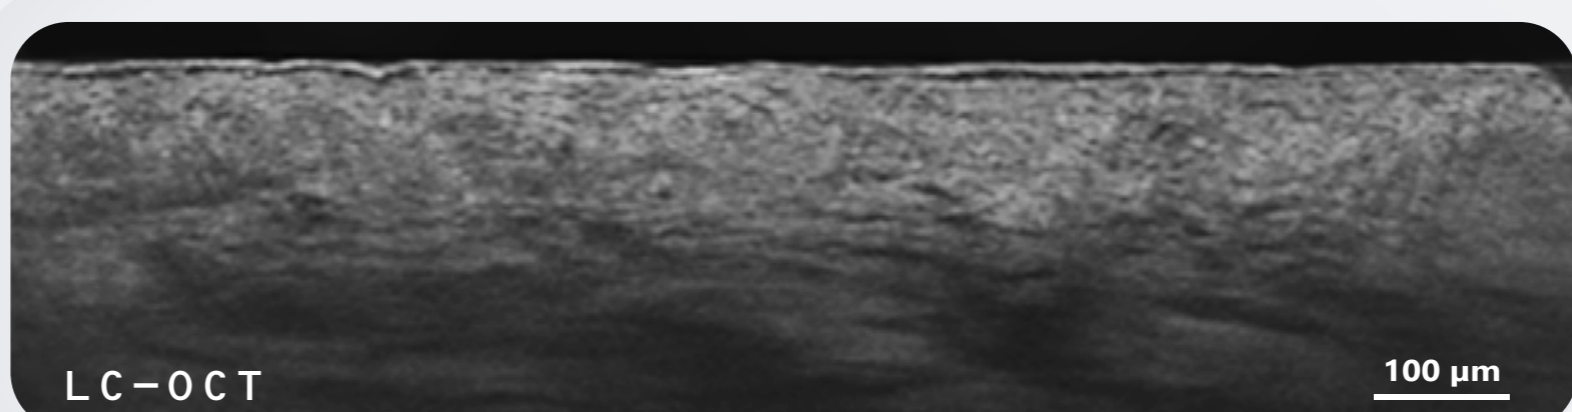

Before

After 2 Session

After 4 Session and 8weeks

Scans were taken below the zygoma using the columella line, but exact location may slightly differ due to micrometer-level sensitivity.

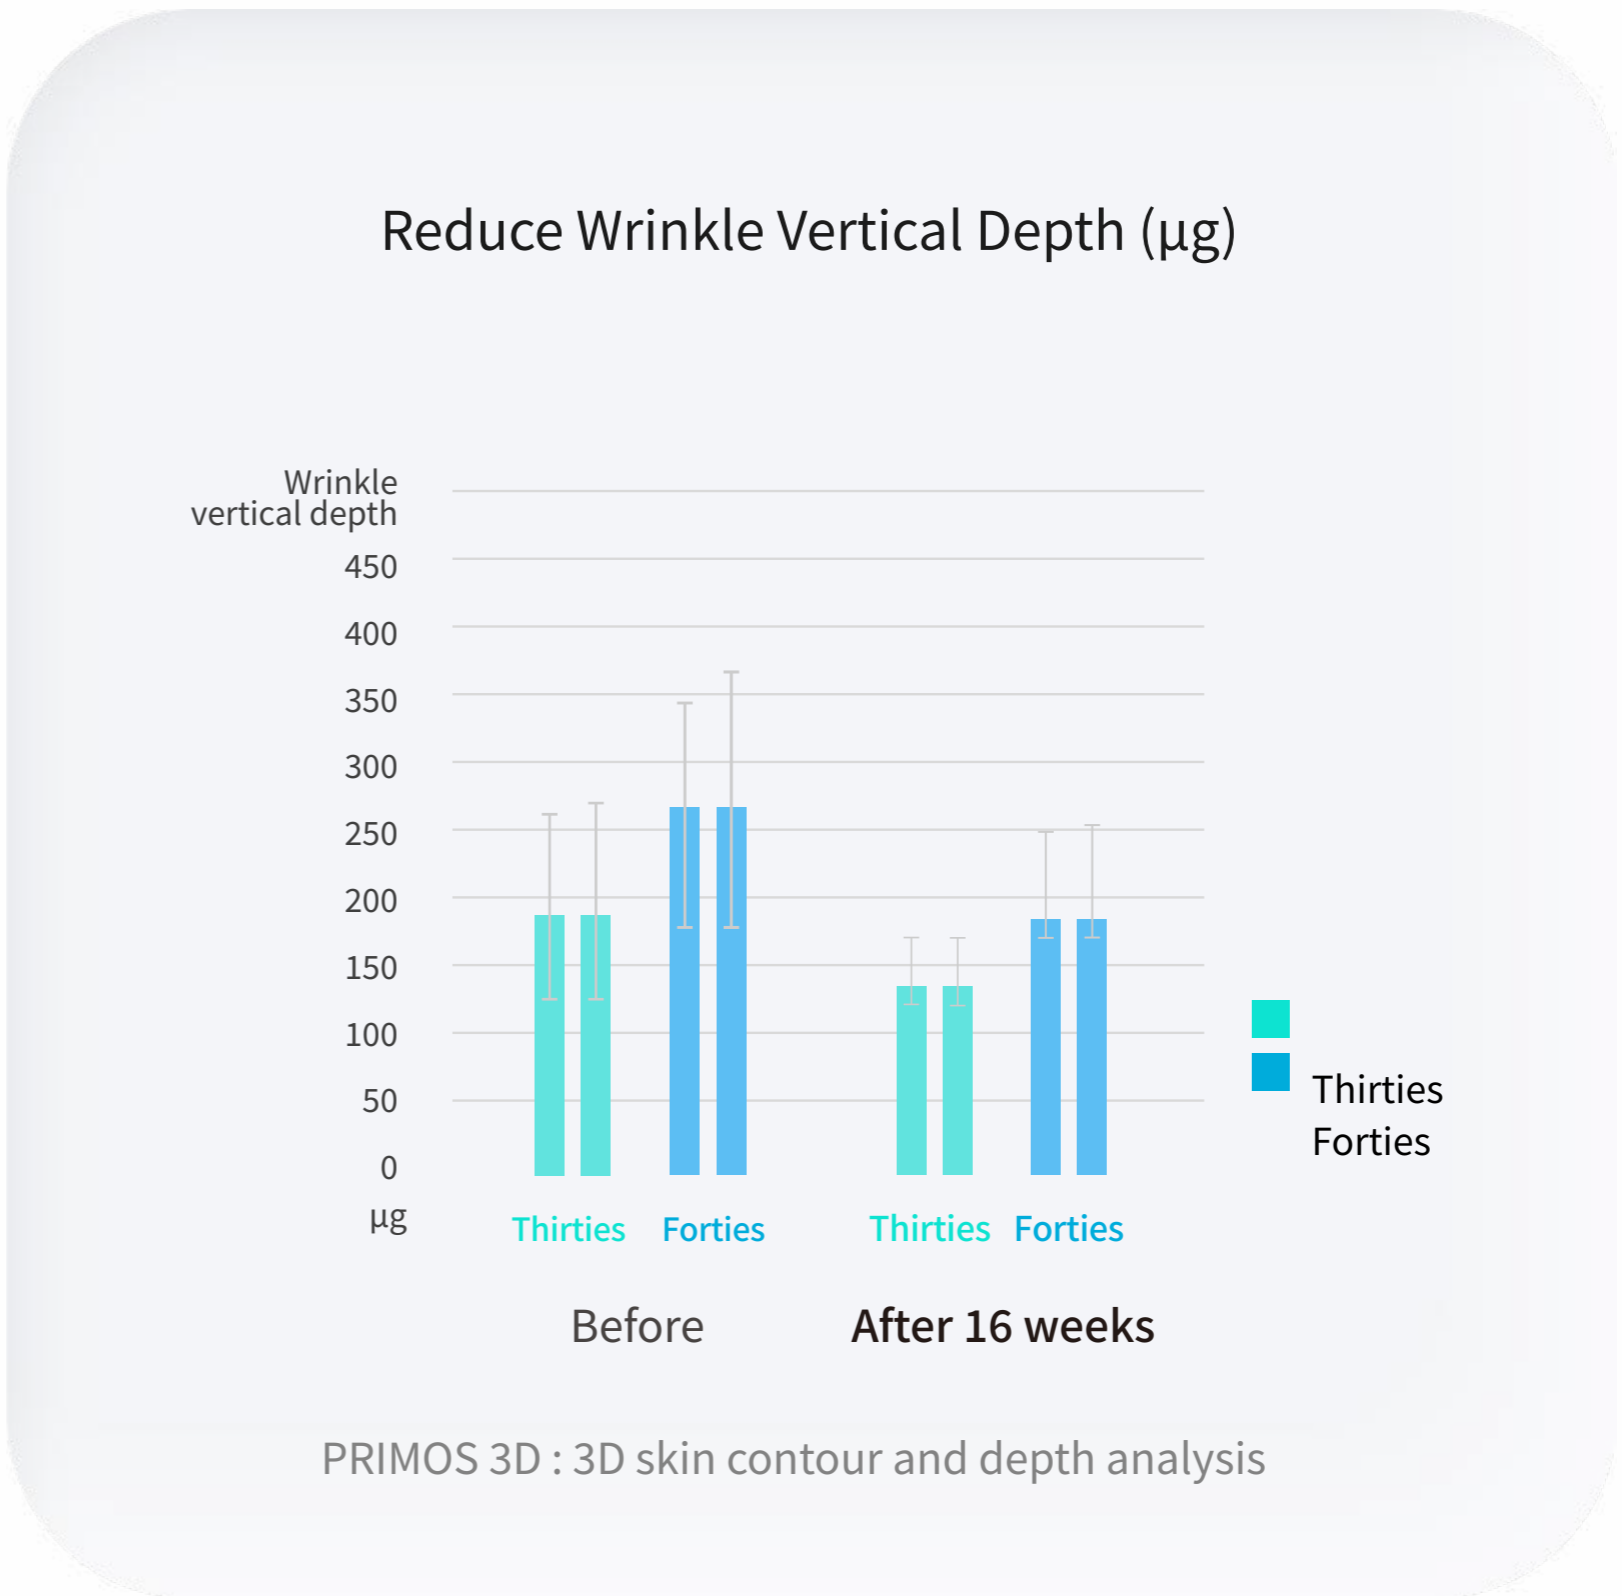

Wrinkle Relief

An average reduction of
↓ 26.96%

An average reduction of
↓ 34.85%

Before

3D PRIMOS scan analysis
2024.07.06

>

After 17 weeks

3D PRIMOS scan analysis
2024.11.02

Before

3D PRIMOS scan analysis
2024.07.20

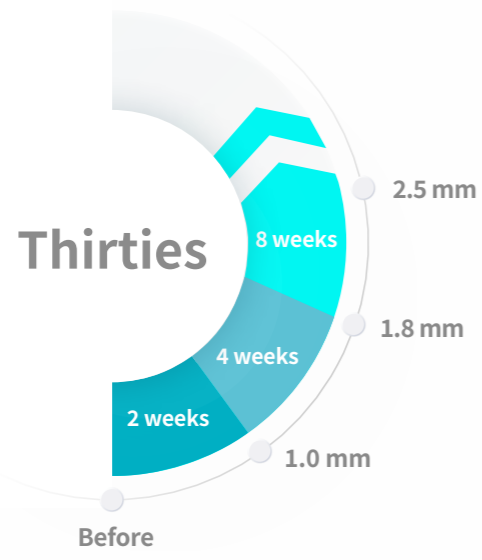

>

After 16 weeks

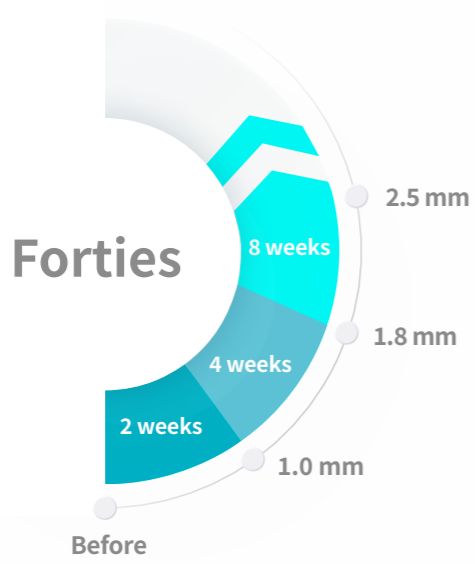

3D PRIMOS scan analysis
2024.11.09

Wrinkle depth was used as the main indicator, since deeper wrinkles are usually longer.

Skin Lifting

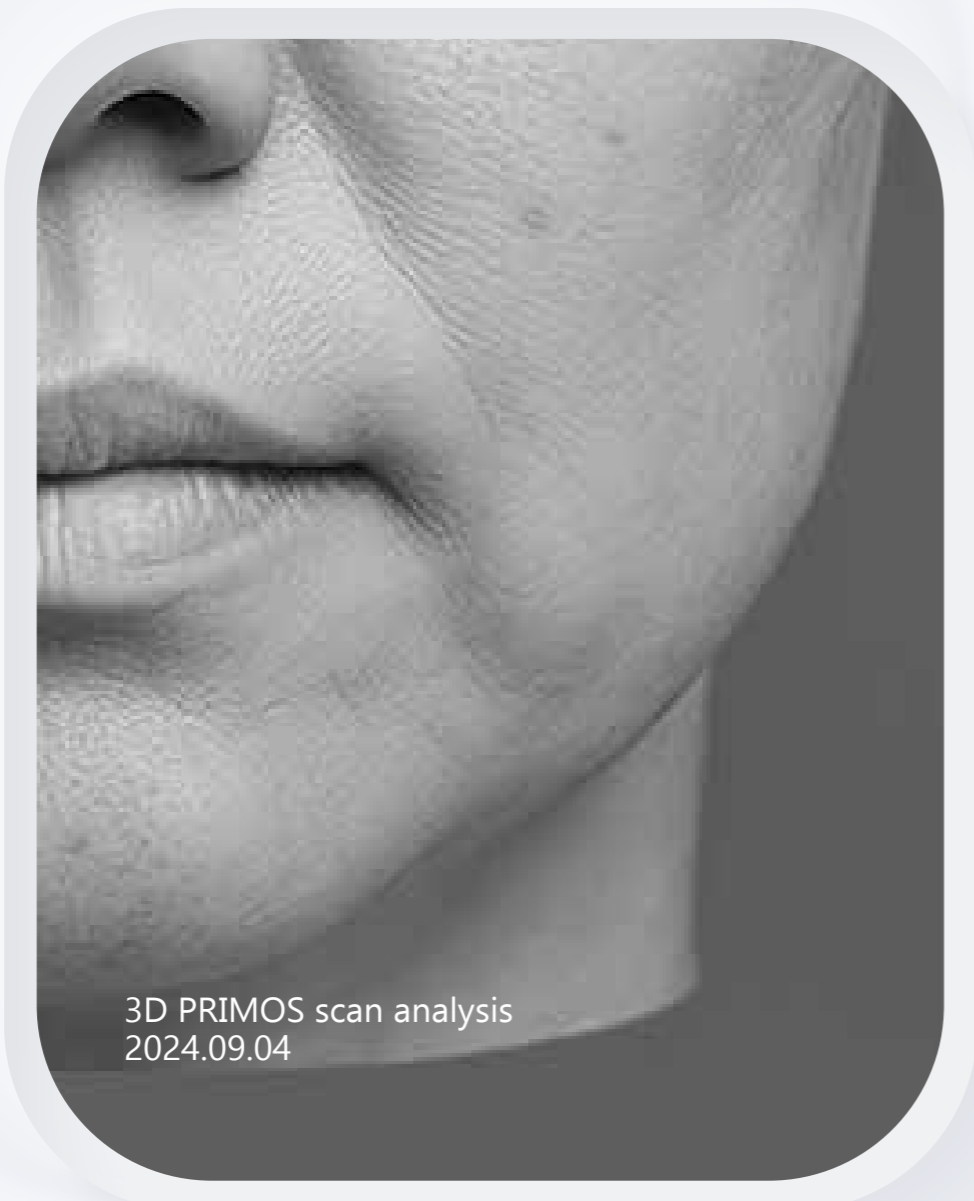

An average lifting of **↑ 2.75mm**

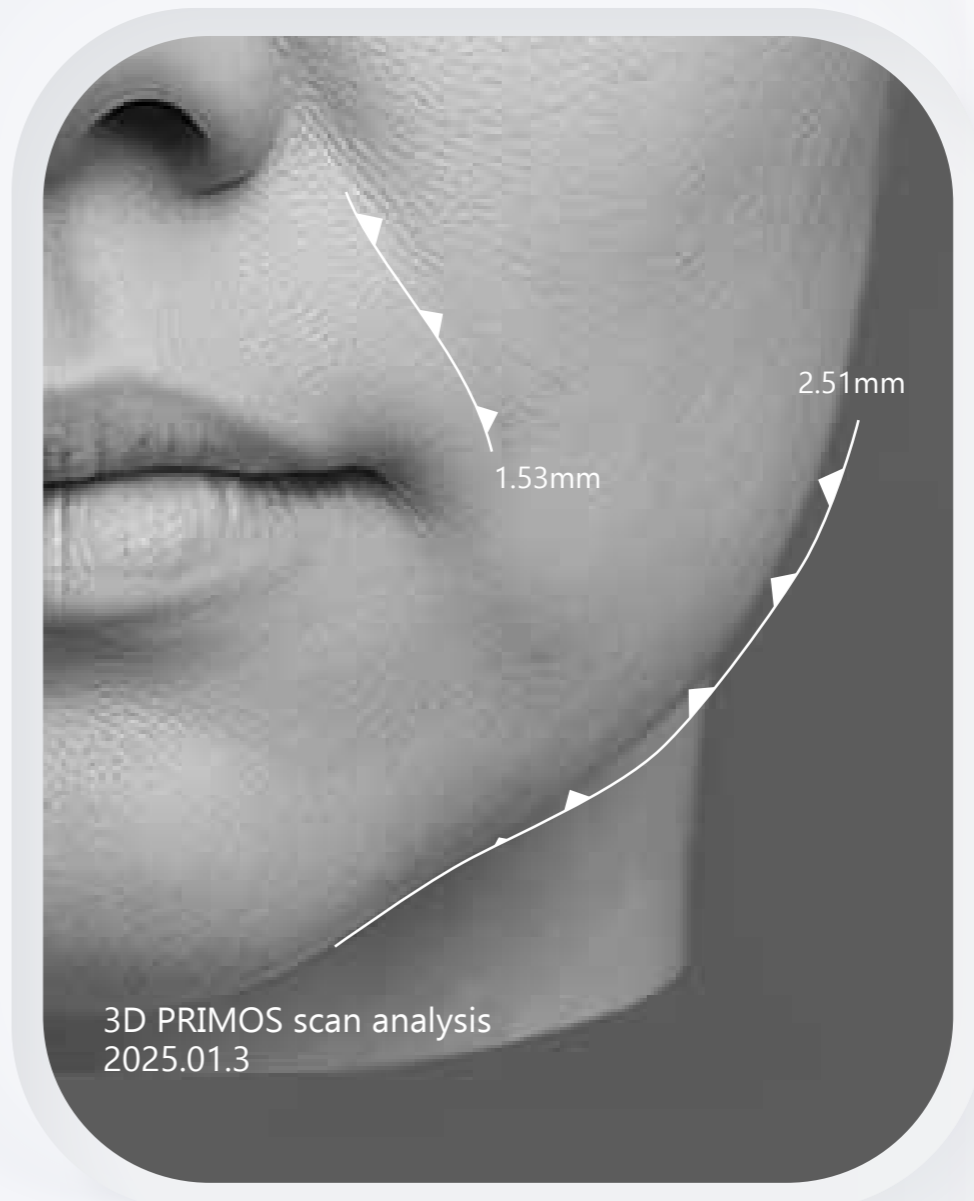

An average lifting of **↑ 3.11mm**

Before

After 17 weeks

The data represents quantified changes in skin and facial contours, measured based on the shortest linear distance using 3D models scanned with the PRIMOS 3D system.

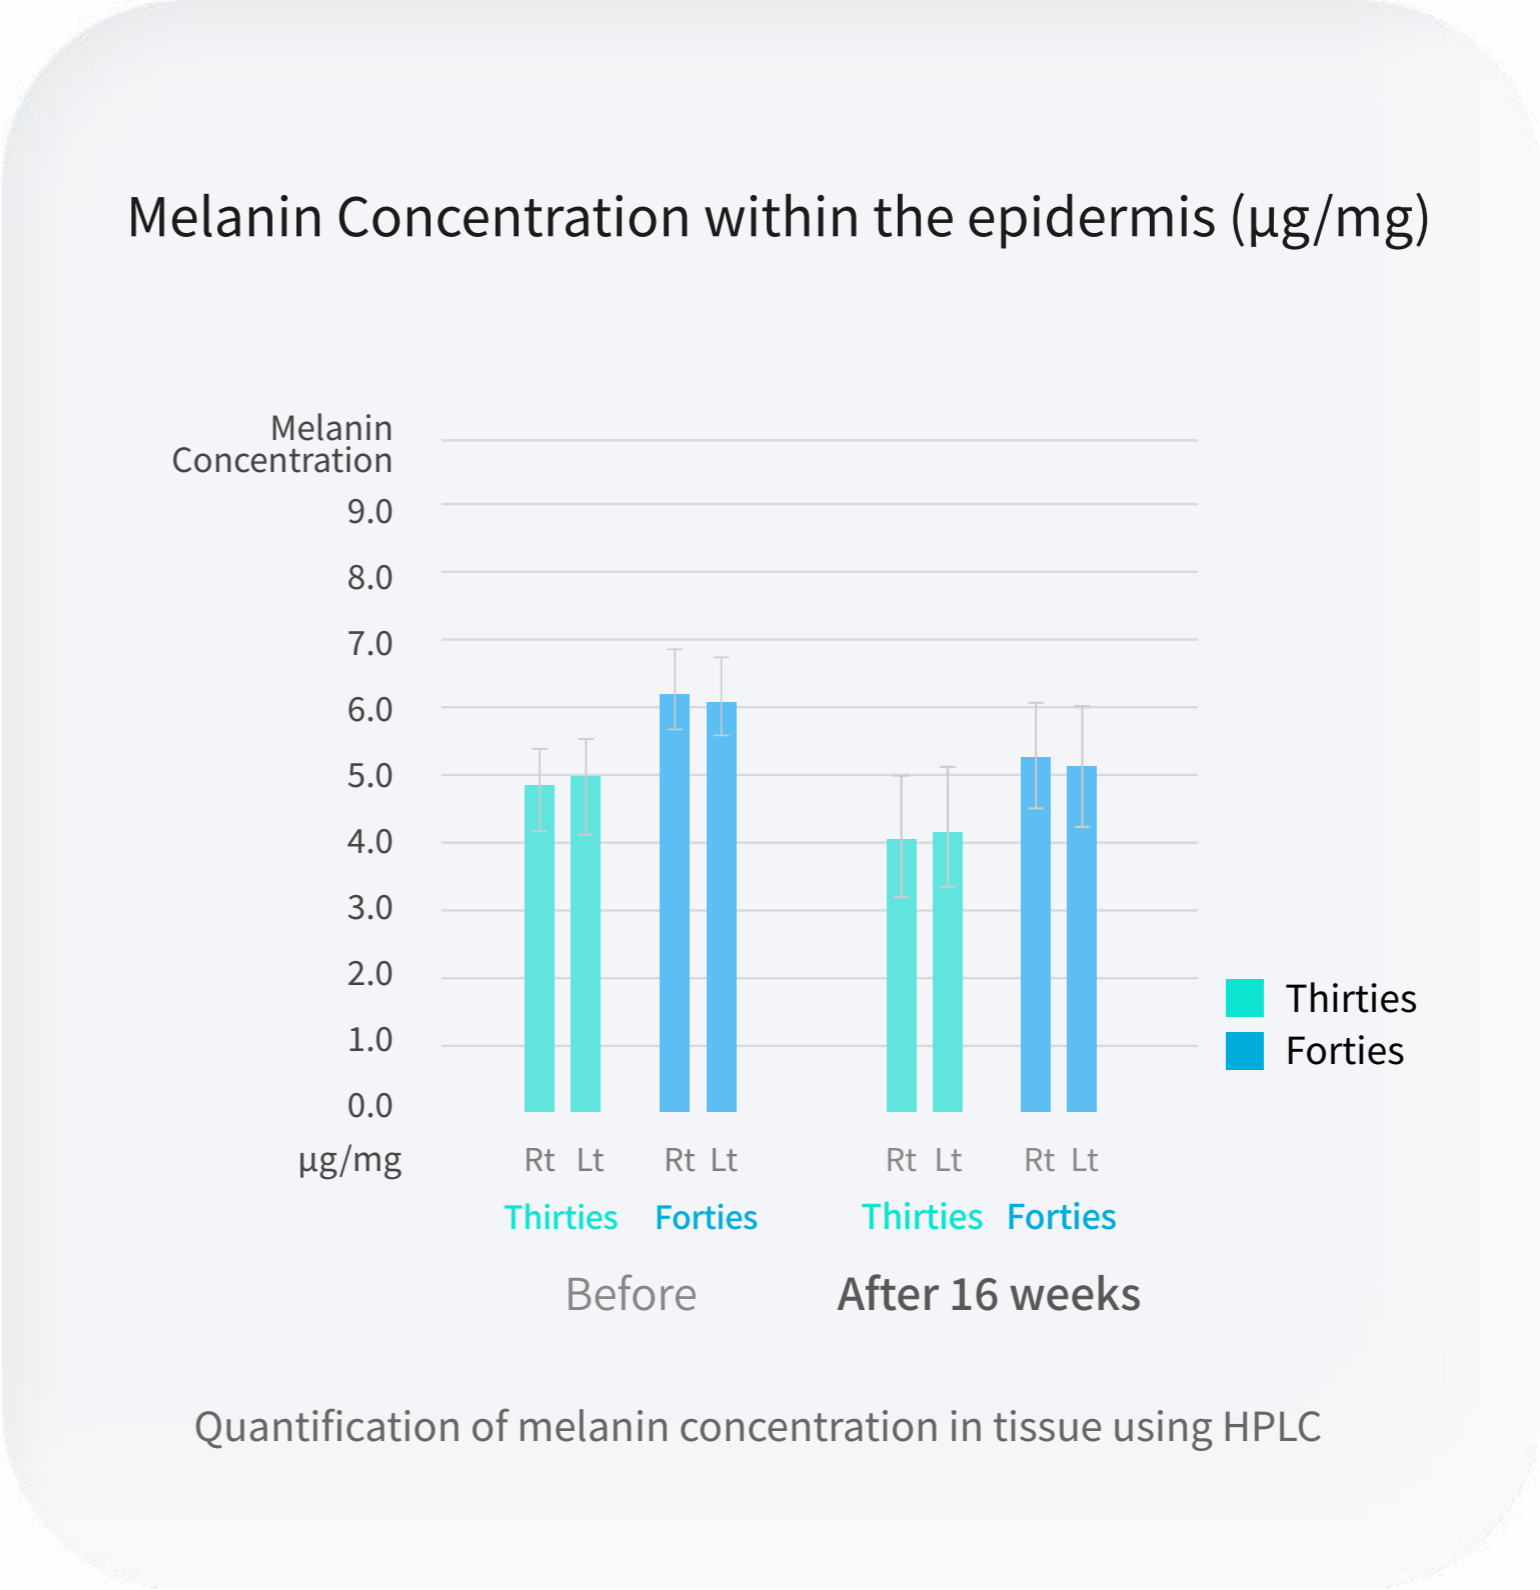

Melanin Deposition

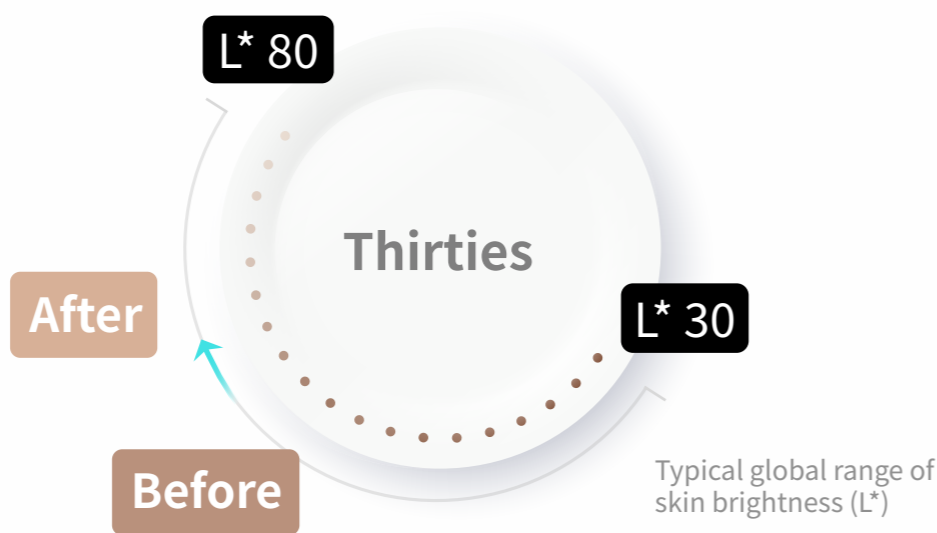

An average decrease of
↓ 18.40%

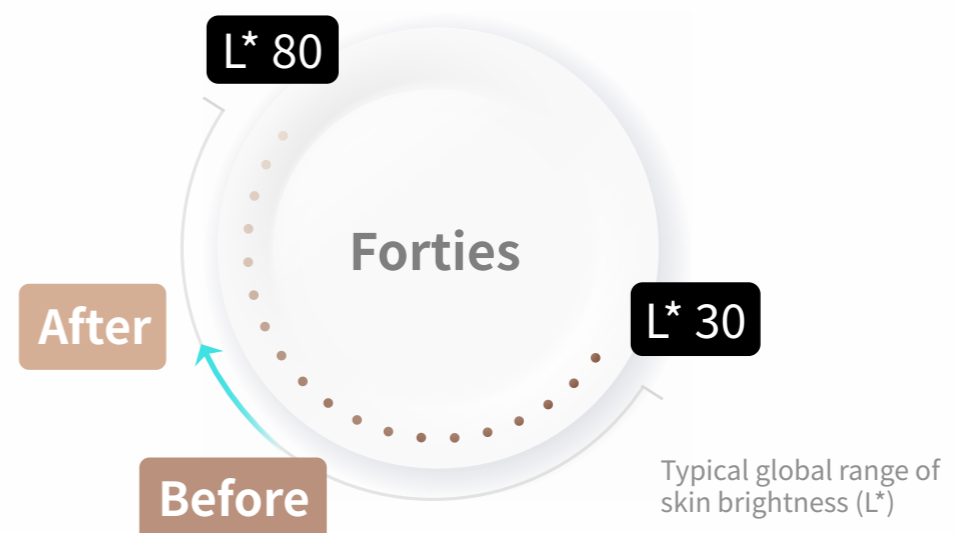

An average decrease of
↓ 18.15%

Tone-up Effect

An average brightening of
↑ 5.97%

An average brightening of
↑ 6.88%

Before

2025.08.24

L* 63.42
measured using a Chroma Meter CR-400

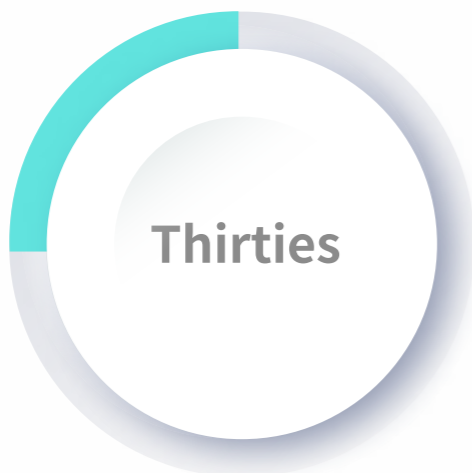

After 17 weeks

2025.12.24

L* 66.64
measured using a Chroma Meter CR-400

Wrinkle depth was used as the main indicator, since deeper wrinkles are usually longer.

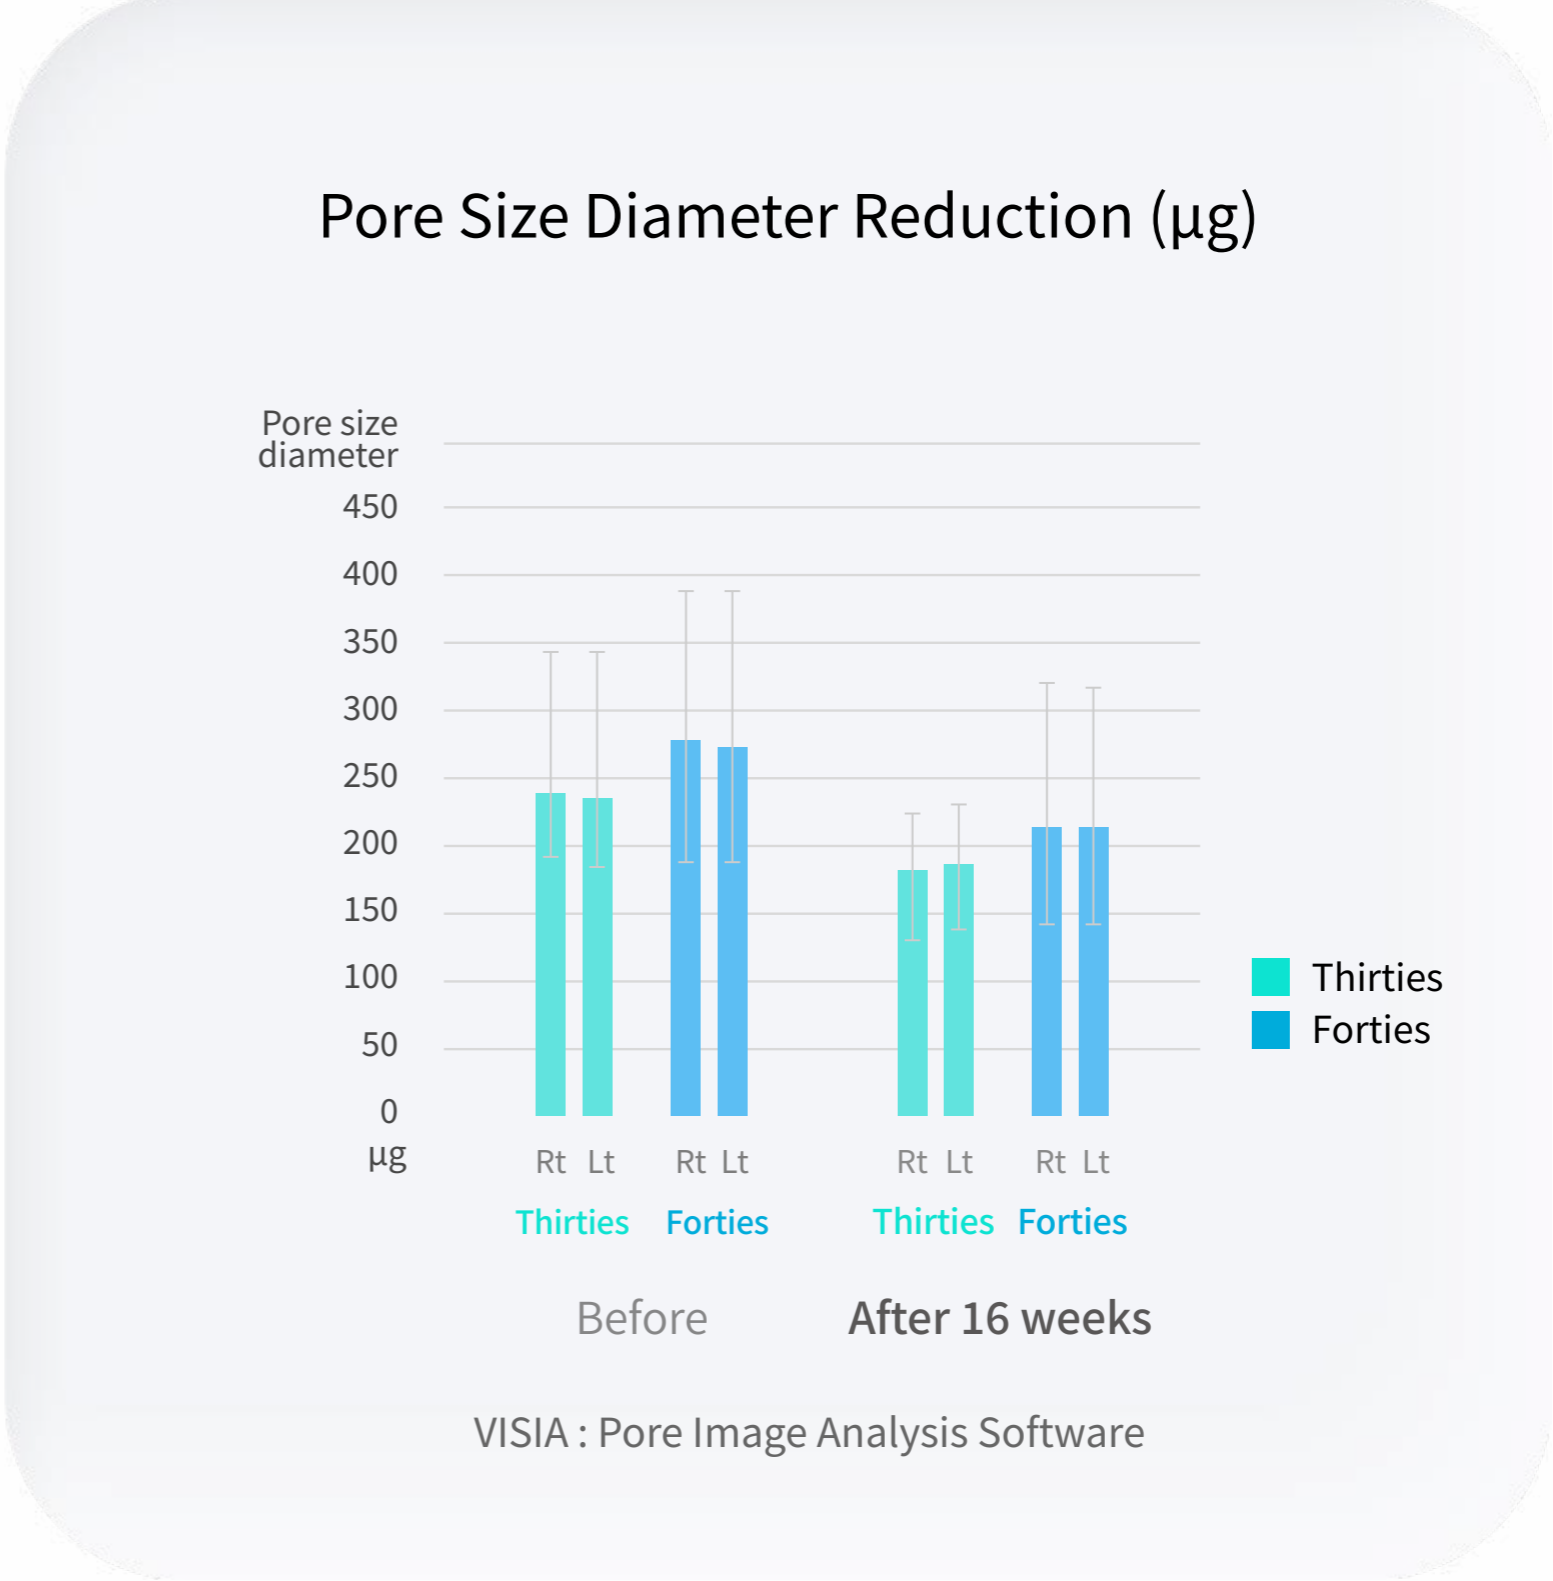

Pore Reduction

An average reduction of
↓ 25.73%

An average reduction of
↓ 27.31%

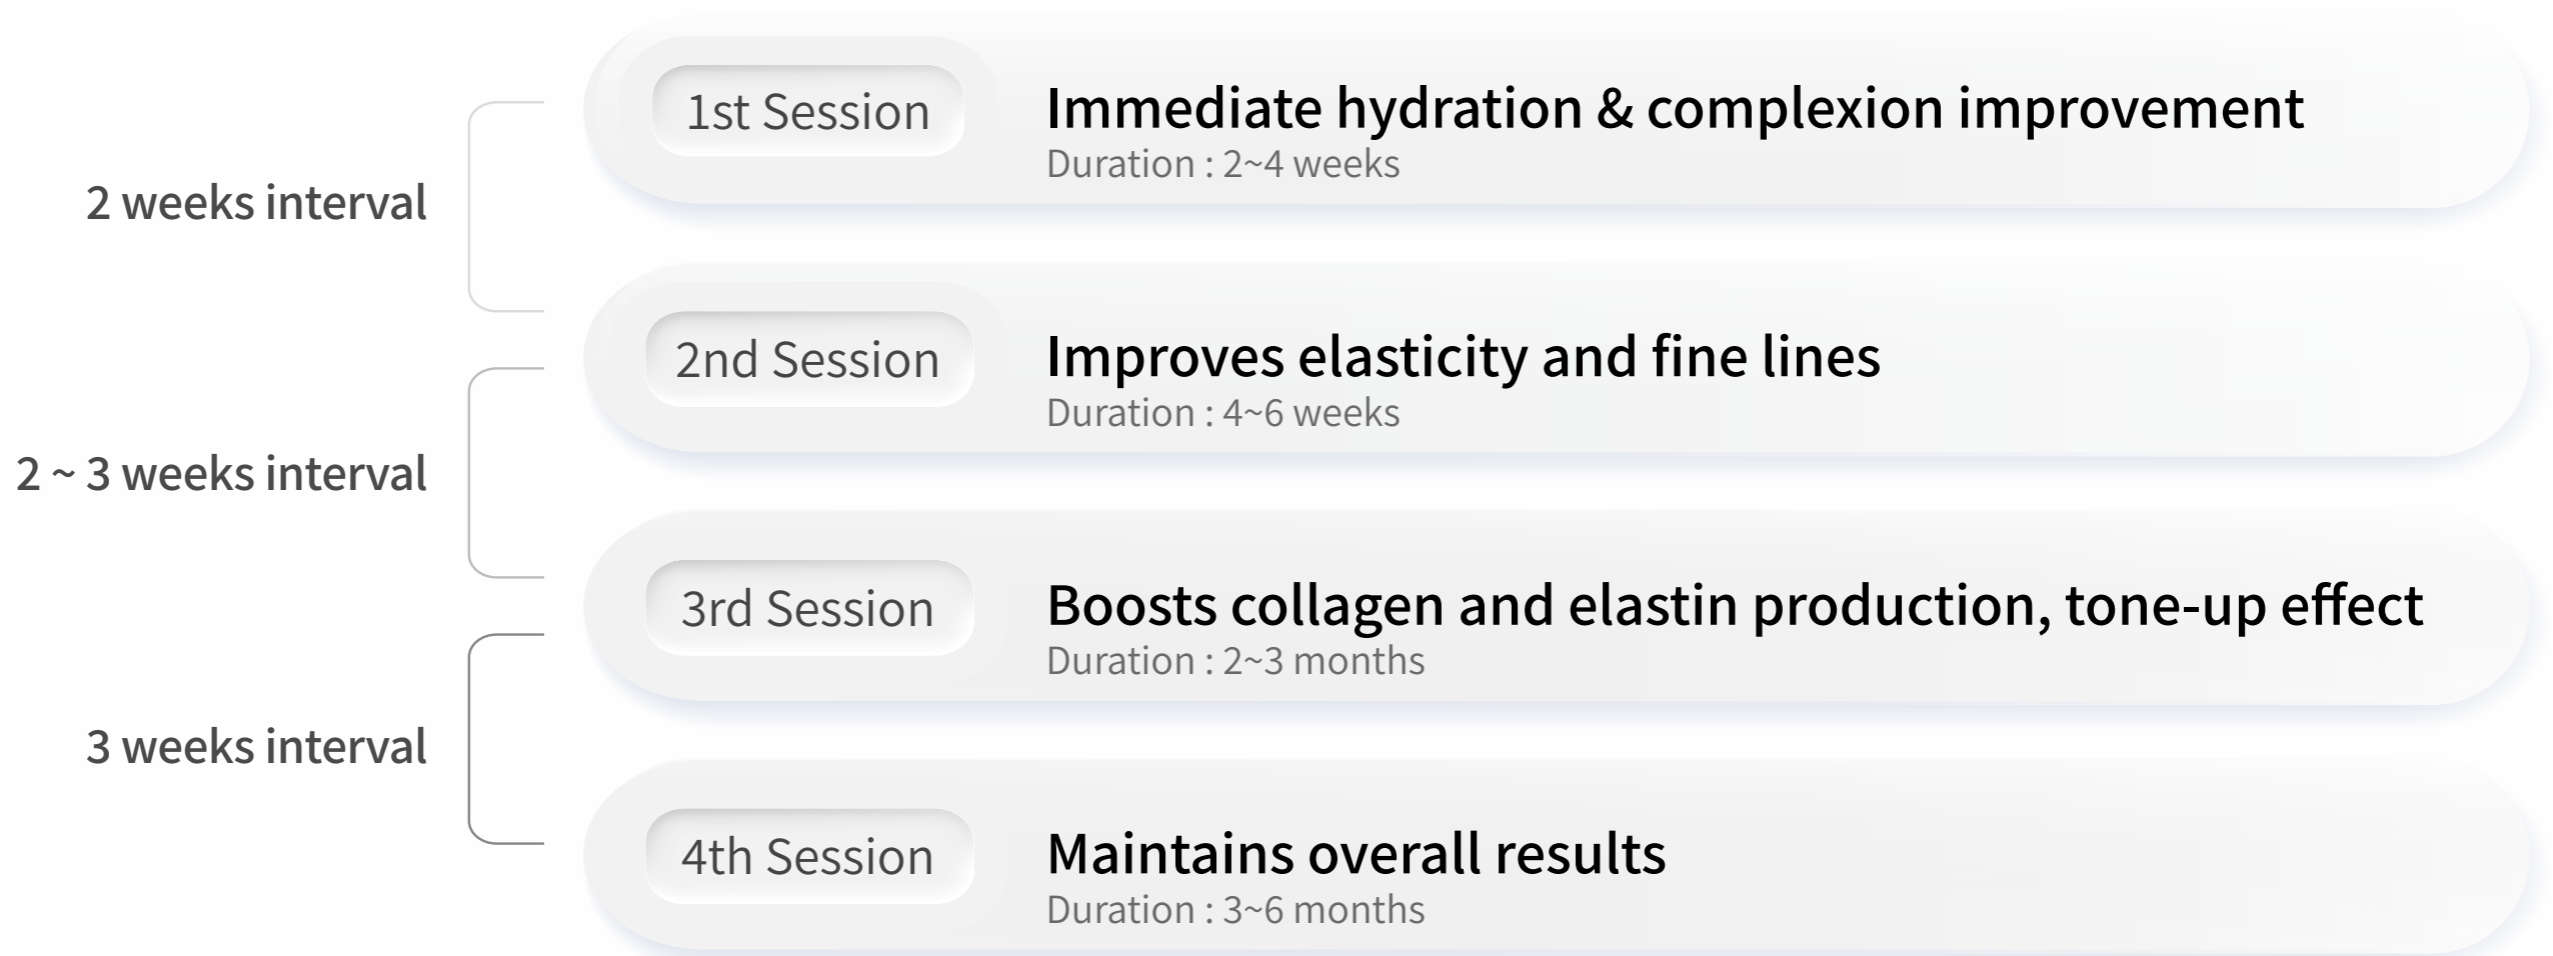

Treatment Protocol & Guidance

Treatment Method & Tools

- **Multi needle Injector (Meso gun)**
Use 31~33G 5-pin or 9-pin multi-needle tips
- **Hand injection**
Use 32~34G single needles

Main Course

Additional Course

Following the main course, after a 3 to 6-month interval

4 Session at 2~3 week intervals

- **Interval and frequency may be adjusted based on**
 - Skin elasticity
 - Degree of wrinkles
 - Dryness
 - Recovery speed
 - Breakouts or sensitivity

Applicable with

- **MTS (Microneedle Therapy System)**
- **RF & Laser Devices**
e.g., Potenza, Secret RF - for improving pores and acne scars
- **Non-invasive Recovery Devices**
e.g., Cryocell, LDM, LED - for soothing and calming the skin
