

Youthfill Filler

Cross-linked hyaluronic acid filler with lidocaine designed for smooth correction, contour support, and facial-volume work in a 1.1 mL syringe format.

Cross-linked HA

With Lidocaine

1.1 mL / 1 Syringe

Fine · Deep · Shape

Made in Korea

Product Overview

Youthfill is a cross-linked HA filler with lidocaine manufactured by RFBIO. The line is built to cover lighter, medium, and stronger correction needs through the Fine, Deep, and Shape range.

Core Facts

- Main composition: Cross-linked hyaluronic acid, lidocaine
- Quantity: 1.1 mL
- Packing: 1 syringe / 1 box
- Country of origin: Republic of Korea
- Brand line: Youthfill Fine, Deep, and Shape

Positioning

- Built for wrinkle correction and contour support
- Suitable for facial-volume and lip-focused work
- Designed for smooth placement and natural-looking finish
- Lidocaine-supported comfort during treatment
- Structured as a multi-depth filler range

FORMAT

Dermal filler

COMFORT

Lidocaine included

RANGE

3 depth options

USE

Correction and volume

Youthfill is a premium hyaluronic-acid dermal filler line for facial rejuvenation, contouring, and hydration, with a smooth consistency and natural-looking finish.

Fine, Deep, and Shape

Youthfill is structured as a three-part range so the same line can cover softer correction, medium-depth support, and stronger contour-focused work.

Fine

Small molecule with lidocaine.

Deep

Medium molecule with lidocaine.

Shape

Large molecule with lidocaine.

Variant	Line Position	What It Supports
Fine	Small-molecule option	Lighter correction, detail work, and softer refinement.
Deep	Medium-molecule option	Balanced wrinkle correction and contour support.
Shape	Large-molecule option	Stronger structure, definition, and volume-focused shaping.

Use Profile

Youthfill works as a versatile HA filler line for lines, contouring, volume restoration, and lip-focused enhancement across different correction depths.

Common Treatment Goals

- Fine-line and wrinkle correction
- Facial contour refinement
- Volume restoration
- Lip enhancement support
- Hydration-focused skin support

Range Advantages

- One line with three molecule profiles
- Consistent 1.1 mL syringe format
- Lidocaine included throughout the range
- Built for natural-looking placement
- Korean-made filler platform
